ADDENDUM
STATEMENT OF FACTS, VARIANCES
AND JUSTIFICATION FOR SAME

This Application concerns the restaurant known as “The Vine” located at 95 Morristown Road (U.S. Route 202) in the Basking Ridge section of Bernards Township. The Lot is 2.27 acres and is located in the R-6 Zone of the Township. A restaurant has been at this location since the 1930s and has been recognized by this Board as a non-conforming use.

Applicant originally intended to renovate the existing restaurant building and maintain the same square footage, parking and lot coverage. However, because of the age of the structure, the deterioration of the mechanical systems and lack of handicap access, the Applicant has elected to demolish the existing building and replace it with a new modern and efficient building with handicap access and new HVAC systems in order to improve not only accessibility but air quality. This would make the structure a safer dining experience in the post COVID-19 era.

The Application is for Preliminary and Final Major Site Plan approval, variances, exceptions and waivers. The existing building size will be increased from approximately 6352 s.f. (1st and second floor) to 7,511 s.f. (1st and second floor). See attached Architectural Plans. This is an increase of 1,159 s.f. Applicant intends to retain the same number of parking spaces at 83¹; maintain the same number of seats (165 indoor plus 50 outdoor)², and maintain the same lot coverage at 38.3%³. Note, there is an additional 190 s.f. in the cellar for office and employee restroom.

The variance previously granted for a solid wall in the front yard is to be eliminated.

Applicant now seeks the following relief from the Board:

- A. Preliminary and Final Major Site Plan approval.
- B. A use variance or an expansion of a non-conforming use by approximately 1,159 s.f.
- C. A parking variance where 151 is required and 83 provided.
- D. Accessory building separation of 10’ is required and Applicant provides 2.3’.
- E. A 50’ buffer to the residential zone is required and Applicant proposes 30.5’. (See Resolution #ZB16-032 at page 1).

¹ Resolution #81-14; Page 1

² Resolution #ZB16-032; Page 7

³ Resolution #ZB05-016l; Page 3

As noted above, lot coverage will remain the same as previously approved in Resolution #3 below.

The justification for the variances are as follows:

Positive Criteria

A. **Use Variance or Expansion of a Non-Conforming Use:** Proofs required in establishing the justification for a use variance or an expansion of a non-conforming use are somewhat similar in nature. This lot has been used a restaurant since the 1930s. It has been temporarily closed because of the COVID-19 pandemic which has decimated the restaurant industry. It was not a voluntary closure and there was no intent to voluntarily abandon the use.

A use variance is justified in our case because the general welfare is served because the use as a restaurant is peculiarly fitted to the particular location. Also, the building proposed by the applicant will create a desirable visual environment, with enhanced safety features of a new HVAC system, more space between tables handicap accessibility which is not present in the existing restaurant. Particular suitability is also demonstrated by the fact that the use is on a U.S. highway and adjacent to office complexes. There is also a substantial landscaping being proposed.

B. **Parking Variance:** The Bernards Township Zoning Ordinance requires 151 parking spaces based upon the square footage of the restaurant. Applicant has 83 spaces which has existed for many years without issue. This parking variance was approved previously. Applicant's traffic engineer will testify that the 83 spaces can adequately accommodate the modest increase in square footage of the restaurant.

C. **Accessory Building Location:** The Bernards Township Zoning Ordinance requires a 10' separation between accessory buildings and Applicant has 2.3'. This condition has existed for many years and will be addressed by the Applicant's planner.

D. **50' Buffer to Residential Zone:** Currently there is a dumpster in the buffer area. This dumpster will be removed. The variance was previously approved by this Board. Additional landscaping is being proposed in this area to mitigate against any impact on the residential zone.

Negative Criteria

There is no substantial detriment to the public good nor is there any substantial detriment to the Zone Plan and the Zoning Ordinance of Bernards Township (emphasis added). The critical word here is "substantial" and involves a balancing of the benefits of the variance against the detriments. As was pointed out, the building has been at this location for over 90 years and is located on a U.S. highway adjacent to office complexes. In fact, what is being proposed by the applicant will be a benefit to the surrounding area. The general welfare is served for the following reasons:

- A. It replaces a deteriorating structure with a new modern structure.
- B. Improved aesthetics of the building.
- C. A new landscaping plan is proposed which improves the aesthetics of the building and provides privacy for surrounding residents.
- D. It creates a safer dining experience by providing more space between tables.
- E. A new HVAC system is proposed which also enhances safety.
- F. It provides handicap accessibility which does not exist today.

There is no negative aspects to this construction since the building exists and has been here for 90 years.

In regard to the use variance and the enhanced burden of proof set forth in Medici v. BPRC, 107 N.J. (1) 1987, the Township Committee did not rezone the property for a restaurant because it would be a one lot zone. The adjacent residential zones and the E zones does not allow for restaurants. The Township is aware that the matter has been before the Board of Adjustment on several occasions and the Board has appropriately handled the case on all occasions.
