# BERNARDS TOWNSHIP ENVIRONMENTAL COMMISSION Regular Meeting of January 25, 2021-7 pm

The Environmental Commission meeting for January 25, 2021 will be conducted using Zoom Video Conferencing. The public will be able to view the meeting live by clicking on this link at 7:00 PM <a href="https://us02web.zoom.us/j/81946801806?pwd=TzZBaSt3bkRrQ2tlTGwvU0ErVzBzUT09">https://us02web.zoom.us/j/81946801806?pwd=TzZBaSt3bkRrQ2tlTGwvU0ErVzBzUT09</a>

Or by calling 1-646-558-8656 and entering Meeting ID: 819 4680 1806 and Passcode: 486763 Public comment will be accepted via e-mail. Please include your name and address in the e-mail and send comments to kcartoccio@bernards.org. They will be read during the public comment section.

#### **Meeting Agenda**

- 1. Call to Order
- 2. Open Public Meeting Statement
- 3. Flag Salute
- 4. Roll Call
- 5. Approval of EC meeting minutes regular December 28, 2020
- 6. Reports and Miscellaneous Correspondence
  - a. 3066 & 3074 Valley Road -LOI
  - b. Yearend report for 2020

#### 7. New Business

- a. Applications
  - i. <u>Rossi-ZB-21-003-14 Culberson Rd-</u>"C" Coverage Variance for construction of an in-ground pool. Patio & cabana.
  - ii. <u>Maschhoff-ZB-21-004-31 Claivaux Ct</u>-"C' Variances for in ground pool coverage-Not behind rear building line of adjacent dwelling
  - iii, Fellowship Village-PB-20-005-8000 Fellowship Rd- Preliminary & final major site plan
- 8. Comments by Public
- 9. Comments by Members
- 10. Adjournment

Kelly Julian, Secretary

Please call (908) 204 - 3000 seventy-two (72) hours in advance if accommodations are required, including assistive listening devices (ALD).

# BERNARDS TOWNSHIP ENVIRONMENTAL COMMISSION MINUTES – December 28, 2020 – 7pm

#### **CALL TO ORDER**

Chairperson Ann Parsekian called the meeting to order at 7:03 pm via Zoom Conference call in accordance with the Open Public Meeting Act of 1975.

#### **FLAG SALUTE**

All those assembled saluted the flag.

#### **ROLL CALL**

Present: Joan Bannan, Debra DeWitt, Nancy Cook, Jane Conklin, John Crane,

James LaMaire, Ann Parsekian, Alice Smyk

Absent: Mahwish Mustafa

Also Present: Kaitlin Cartoccio – Recording Secretary, Todd Edelstein - Resident

#### **APPROVAL OF MEETING MINUTES**

Motion to approve the November 23, 2020 minutes made by Alice Smyk seconded by Nancy Cook. All in favor, motion carried.

### REPORTS & MISCELLANEOUS CORRESPONDENCE

a. Social Media Outreach Project

Pumpkin Smashing – not sure about participation. Recycle Coach app for phones. Future posts could include disposing masks and cutting ear strings which helps protect wildlife. Discussion of where and how to post environmental tips. Look into Constant Contact or RAVE/Smart 911.

b. 2021 Meeting Dates

#### **NEW BUSINESS**

**a.** Shaw – ZB-20-021 490 South Maple Ave – Minor Subdivisions use variance bulk variance

Debra DeWitt recused herself at 7:33 pm. In regard to this application, pool water discharge may result from backwashing of filters, or from the draining of swimming pools at the end of season, or during maintenance. This water often contains pool treatment chemicals that can cause damage to the receiving environment in the form of non-point source pollution. Therefore, the Environmental Commission wants township residents to use the best management practices available when discharging pool water. Additionally, the Commission would like the applicant to make sure silt fencing is maintained properly considering its proximity to the Passaic River. The Commission would also like the applicant to consult with the tree and shrub list on the Environmental Commission's page and avoid planting Norway Spruce which is an invasive species. The applicant should also consider the number of trees when replacing.

Motion by John Crane, seconded by Nancy Cook.

All in favor, motion carried.

 Reilly-ZB-20-024 48 Lyons Place – Pool not located behind the rear building line of an adjacent dwelling

Debra DeWitt returned at 7:47 pm. In regards to this application, **pool water discharge** may result from backwashing of filters, or from the draining of swimming pools at the end of season, or during maintenance. This water often contains pool treatment chemicals that can cause damage to the receiving environment in the form of non-point source pollution. Therefore, the Environmental Commission wants township residents to use the best management practices available when discharging pool water. The Commission would ask the Board to remind the applicants that they are virtually at capacity on lot coverage and that any future additions such as patios, sheds, pools or any other impervious surface coverage items would put them over the limit. The Commission suggests they discuss this with the applicant and perhaps the applicant may want to consider reducing the amount of impervious surface coverage. There needs to be a clarification of impervious coverage as 1,326 sq feet is indicated on page 3 while page 4 shows it at a 600 square foot increase after reducing for pool and spa water surface. This is not permitted in Bernards Township so stormwater calculations need to be redone using 1,326 square feet. The Environmental Commission notes the lack of details regarding the recharge of stormwater as part of the proposed development. The recharge of stormwater is required when impervious surface is increased by > 1,000 sq ft. Site drainage in general is a concern due to the existing characteristics of the property, for example the presence of poorly drained soil.

Motion by Debra DeWitt, seconded by Jane Conklin.

All in favor, motion carried.

**b. Khoshaba** – **ZB-20-025 44 Old Farm Road** – Pool not located behind rear building line of adjacent dwelling

James LaMaire and Nancy Cook left the meeting at 8:01 pm. In regards to this application, **pool water discharge** may result from backwashing of filters, or from the draining of swimming pools at the end of season, or during maintenance. This water often contains pool treatment chemicals that can cause damage to the receiving environment in the form of non-point source pollution. Therefore, the Environmental Commission wants township residents to use the best management practices available when discharging pool water. Only 33% voids are permitted by Bernards Township so the drywell design (which is using 40% voids) needs to be recalculated.

Motion by Alice Smyk, seconded by Debra DeWitt.

All in favor, motion carried.

c. **Keith** – **ZB-20-026 Eton Place** – Side yard setback relief for pergola to be constructed on existing patio

Was there a previous variance granted, several numerical values need to be clarified regarding lot coverage calculations.

Motion by Debra DeWitt, seconded by Alice Smyk.

All in favor, motion carried.

#### **COMMENTS BY PUBLIC**

Todd Edelstein commented about the push to recycle Christmas tree. He indicated there was W9 Social Security number in the packet. He also mentioned some comments from the previous Planning Board meeting.

#### **COMMENTS BY MEMBER**

John Crane commented that he will not be on the Environmental Commission in 2021. Several members thanked him for his time on the board.

#### **ADJOURNMENT**

Meeting was adjourned at 8:32 pm by John Crane and seconded by Joan Bannan. All in favor, motion carried.

Respectfully submitted, Kaitlin Cartoccio, Meeting Secretary

**TO:** Zoning Board Chairperson and Members

**FROM:** Ann Parsekian, Chairperson

Bernards Township Environmental Commission

**DATE:** December 28, 2020

**RE:** Applications review

The Environmental Commission reviewed these applications at their December 28, 2020 meeting and forwards the following comments.

#### **Zoning Board**

#### Shaw ZB20-021. 490 South Maple Avenue

The Environmental Commission has reviewed new materials for this application and offers the following comments:

1. The Environmental Commission notes the Applicant proposes to remove trees in connection with development of the new lot. Norway Spruce is listed as a replacement species; however, this species is an invasive species in New Jersey. We recommend that the Applicant consult the Recommended Tree and Shrub List provided on the Environmental Commission webpage: <a href="https://www.bernards.org/boards/environmental">https://www.bernards.org/boards/environmental</a>

The Environmental Commission asks that the Applicant be required to contribute to the Township Tree Fund for any trees they do not plant.

- 2. The Commission notes that the remainder lot will retain an existing swimming pool. Pool water discharge may result from backwashing of filters, or from the draining of swimming pools at the end of the season, or during maintenance. This water often contains pool treatment chemicals that can cause damage to the receiving environment in the form of non-point source pollution. Therefore, the Commission wants township residents to use the best management practices available when discharging pool water.
- 3. In light of the close proximity of this property to the Passaic River, the Commission urges the Applicant to carefully maintain the proposed silt fencing during the entire construction period.

#### Reilly ZB20-024 48 Lyons Place

The Environmental Commission has reviewed this application and offers the following comments:

- 1. With regard to this application, pool water discharge may result from backwashing of filters, or from the draining of swimming pools at the end of season or during maintenance. This water often contains pool treatment chemicals that can cause damage to the receiving environment. Therefore, the Environmental Commission wants township residents to use the best management practices available when discharging pool water.
- 2. The Commission notes that the Applicant has reduced the total amount of impervious coverage by the amount of pool and spa water surface for storm water calculation purposes, which is not in accordance with Bernard Township ordinance. The Commission asks that the amount of additional impervious coverage be clarified on the submission materials and plans, and that the Applicant address any necessary stormwater requirements.

The Commission finds that note #9 of "Drainage & Grading Notes" on Drawing 4 states: "Existing stormwater drywells may exist on-site as part of previous construction installations, whereas no known locations were discovered during routine topographic property survey." This seems to contradict the existing drywells shown on Drawing 2. The Commission recommends that the Applicant document the existence and location of any existing drywells, and identify stormwater sources for each drywell.

3. The Commission would ask the Board to remind the Applicants that they are virtually at maximum permitted lot coverage and that any future additions or any other impervious surface coverage features (such as additional pavers or similar impervious material on the south side of the pool), would put them over the limit. The Commission suggests discussing this with the Applicant and perhaps the Applicant may want to consider reducing the amount of impervious surface coverage (in addition to removing the circular patio and adjoining walkway as currently proposed).

#### Khoshaba ZB20-025, 44 Old Farm Road

The Environmental Commission has reviewed this application and offers the following comments:

- 1. With regard to this application, pool water discharge may result from backwashing of filters, or from the draining of swimming pools at the end of season or during maintenance. This water often contains pool treatment chemicals that can cause damage to the receiving environment. Therefore, the Environmental Commission wants township residents to use the best management practices available when discharging pool water.
- 2. The Commission notes that the Drywell Design calculation on Sheet 4 assumes 40% voids whereas 33% voids is required by Bernards Township.

#### Keith ZB20-026 34 Eton Place

The Environmental Commission has reviewed this application and offers the following comments:

- 1. The Commission notes that documentation of either a previous variance or grandfathering for exceeding lot coverage as noted in the Applicant's December 22 letter was apparently not included in the application materials reviewed.
- 2. The Commission requests clarification of the lot coverage calculations. There appear to be discrepancies between the figures shown on the Applicant's spreadsheet and the lot coverage chart on the 2013 survey.

The Commission notes that the lot coverage appears to currently exceed the permitted maximum. Increased impervious coverage increases the volume (quantity) of stormwater runoff, which can contribute to local and potentially area-wide flooding. Site Drainage is the concern, therefore site features to promote stormwater infiltration should be considered. The New Jersey Department of Environmental Protection Green Infrastructure website is a good reference for "green" stormwater management practices for homeowners. <a href="www.nj.gov/dep/gi/">www.nj.gov/dep/gi/</a>

SENT VIA CERTIFIED MAIL

To: Property Owner or Interested Party

Application for Freshwater Wetlands Letter of Interpretation-Line Verification Re:

& Transition Area Waiver-Averaging Plan

Applicant: Cliff Stanfield, Principal of Braemar Partners

Subject Property: 3066 and 3074 Valley Road

Block 8201, Lots 22 & 23

Bernards Township, Somerset County

Dear Property Owner or Interested Party:

This letter is to provide you with legal notification that an application for a Freshwater Wetlands Letter of Interpretation-Line Verification and Transition Area Waiver-Averaging Plan will be submitted to the New Jersey Department of Environmental Protection, Division of Land Resource Protection for the project shown on the enclosed plans. A brief description of the proposed project follows:

The site is currently developed with two (2) single family dwellings and associated improvements. The proposed project is to remove current structures/improvements, and develop the site with a senior living facility, including associated features such as a parking lot, stormwater detention basin, and passive recreation areas. The Letter of Interpretation-Line Verification is to verify wetland and transition area limits on the project site, while the Transition Area Waiver-Averaging Plan is for reduction of the standard transition area for site grading and general improvements associated with the senior living facility. Transition area compensation of equal or greater square footage and ecological value, will be provided elsewhere on the property.

The complete permit application package can be reviewed at the municipal clerk's office in the municipality in which the site subject to the application is located or by appointment at the Department's Trenton Office. In addition, an electronic copy of the initial application can be provided via an OPRA request by contacting https://www.nj.gov/dep/opra/opraform.html from the Department's Trenton Office. The Department of Environmental Protection welcomes comments and any information that you may provide concerning the proposed development and site. Please submit your comments within 45 calendar days of the receipt of this letter to:

If By Regular Mail:

January 25, 2021

The following is a summary of the 2020 activities of the Bernards Township Environmental Commission ("EC" or "Commission").

#### **Mission Statement**

The Bernards Township Environmental Commission is responsible for ensuring that environmental issues in Bernards Township NJ are given the right priority in order to protect and preserve natural resources of the Township and surrounding areas including land, water, air, and bios (flora, fauna, wildlife). As a result of NJDEP having oversight of the NJ Historic Preservation Office, occasionally the EC will offer historic-preservation comments in accordance with the Bernards Township Master Plan.

#### **Goals**

The Commission accomplishes its mission via:

- (a) taking proactive stances on local environmental matters, and strengthening the local planning process
- (b) coordinating rational, balanced reviews of development applications for the appropriate township bodies
- (c) increasing public awareness and understanding of local and regional environmental issues
- (d) keeping abreast of, and being involved in, environmental issues that affect our surrounding areas and communities
- (e) staying up to date on ordinances and regulations for Bernards Township with training sessions.

#### 2020 Summary

#### General:

During 2020, the EC held ten meetings. As an advisory body, the EC continued to provide commentary to the Planning Board, Board of Adjustment, and Township Committee regarding environmental impacts and issues. As a result of covid19, one scheduled meeting was cancelled and seven were conducted virtually via Zoom conference call. In addition, agendas and all meeting materials were made available on the Bernards Township website. Members are in favor of making this improvement permanent after in-person meetings resume.

During 2020, the EC reviewed 36 development applications and revisions: 28 Board of Adjustment; 8 Planning Board. In comparison, during 2019, the EC reviewed 23 Board of Adjustment and 2 Planning Board applications.

#### **Budget:**

In 2020, as a result of limited events and programs during the covid19 restrictions, the EC committee spent \$8.00.

#### 2020 Accomplishments:

The EC accomplished its mission in 2020 through the following initiatives:

#### • Development Application Reviews

The EC reviewed and commented on environmental concerns related to property development applications. The EC comments within 2020 calendar year emphasized green infrastructure to promote storm water infiltration and suggested stormwater best management practices to protect wetlands and surface water bodies. Also, comments were made concerning disturbance of steep slopes, tree replacement species and calculations, drainage, lot coverage, pool water discharge best methods, best management practices for freshwater wetlands, stream buffers. When applicable, the EC noted that NJDEP Land Use Permits requirements be considered for development applications. The EC also commented on historic preservation concerns in connection with one application that included demolition of a 19<sup>th</sup>-century house.

#### Tree Removal Applications

The EC works cooperatively with the Township's Shade Tree Commission and Engineering Department to assess proposed tree removal applications. The assessments focus on any safety issues associated with the tree; the health of the tree; and overall appropriateness of the removal requests. Typically, tree removals are completed in conjunction with replacement/mitigation measures. There were no Tree Removal Applications reviewed during 2020.

#### Public Comment

A public comment period is set aside in each meeting, which allows citizens to bring environmental questions and concerns to the attention of the EC. The public comments are recorded in the meeting minutes and, as appropriate, the EC advises the citizen(s) on the question itself or directs them to the proper Township personnel. The EC was able to accommodate public comment during virtual meetings.

#### Charter Day

The 2020 Charter Day event was cancelled.

#### • Social Media Outreach

The EC initiated a series of environmental-related posts on FaceBook. The first post was for a Halloween-themed, virtual pumpkin smashing/composting event. Additional posts related to recycling subjects.

The EC looks forward to continuing to serve Bernards Township and its residents in 2021.

Respectfully submitted on behalf of the Bernards Township Environmental Commission.

Re: Variance Application ZB21-003

Dear Township of Bernards Zoning Board,

We would like to amend our application, # ZB21-003 to include:

- 1- A variance for an 8ft high deer fence in the rear yard where the maximum feet allowance is 6ft, section ordinance 21-16.2. b. Please reference submitted survey from Wunner Engineering as well as photos we took.
- 2- A variance for the fence being less than Coinches from the property line in a couple places, section or dinance 21-16.2.e.

please note the fences (deer, aluminum and pvc) were installed before we purchased the property.

Township of Bernards Planning Board Attn: Cyndi Kiefer, Board Secretary Municipal Building 1 Collyer Lane Basking Ridge, New Jersey 07920

Re: Fellowship Senior Living, Inc. ("Applicant")

Application for Preliminary and Final Site Plan Approval ("Application")

Block 9301, Lot 33

#### Dear Ms. Kiefer:

This office represents Fellowship Senior Living, Inc., the owner of certain property located at 8000 Fellowship Road and known on the tax maps of the Township of Bernards as Block 9301, Lot 33 (the "Property"). The Property is located within the R-2 residential zoning district.

Applicant seeks preliminary and final major site plan approval from the Township of Bernards Planning Board to make certain improvements to Fellowship Village, which is a continuing care retirement community that currently operates at the Property, as further detailed in the enclosed Project Description.

In support of this Application, the following are enclosed for your review:

- Four (4) sets of the Township of Bernards Planning Board Application, including the applicable checklist, to which the following Exhibits are attached:
  - Exhibit A: Project Description;
  - Exhibit B: Statement of Ownership;
  - Exhibit C: Original 200' Property Owners' List;
  - Exhibit D: Certification as to Paid Taxes;
  - **Exhibit E**: Site Inspection Consent;
  - Exhibit F: List of Other Required Approvals;
  - **Exhibit G:** Tree Removal Permit;
  - **Exhibit H:** Contribution Disclosure Statements;

### **EXHIBIT A**

#### Fellowship Senior Living, Inc. Block 9301, Lot 33

#### **Project Description**

December 18, 2020

Fellowship Senior Living, Inc. ("Applicant") is seeking preliminary and final major site plan approval in connection with proposed improvements to the Fellowship Village continuing care retirement community ("Fellowship Village"). Fellowship Village currently operates at 8000 Fellowship Road, known on the tax maps as Block 9301, Lot 33 in the Township of Bernards (the "Property"). The Property is located within the R-2 residential zoning district, where Fellowship Village is a permitted conditional use. The Property is an approximately 72-acre lot that has frontage on Allen Road (County Route 652) and Martinsville Road (County Route 525).

Fellowship Village is comprised of numerous buildings and related site improvements, including, but not limited to, residences, a vibrant community center, health center, parking areas, and stormwater management facilities. The community was constructed in the mid-1990s and has received previous approvals from the Planning Board since then, including approval in 2016 to expand and make other improvements to the community and Property.

The improvements to Fellowship Village proposed by this Application are as follows:

#### Fitness Center and Salon

Applicant proposes the construction of a new, two-floor, 14,447 square foot structure to serve as a fitness center and salon. The upper level of this proposed addition will connect to the main floor of the community center. The lower level is largely below grade (underground) except for the western area, which has windows. The upper level will contain a fitness studio, including a separate room for group fitness classes. The lower level will contain a salon and barber shop. The existing salon and massage services will be relocated to this new addition.

#### Club Locker Rooms Renovations

The men's and women's changing/bathrooms are currently on one side of the existing pool. There is currently only one shower available, which is located inside the pool area, visible to everyone. As currently constituted, these changing/bathrooms, which could also be considered locker rooms, do not allow ample space for individuals to shower and change after exercise. Applicant proposes to expand the men's club locker room by using the footprint of the old changing/bathrooms and incorporating the existing area of an adjacent independent living unit. As for the women's clubroom, Applicant proposes to expand the space through a renovation of the existing fitness center and a small, 180 s.f. addition. These renovations will result in the loss of one independent living unit, bringing the overall total of independent living units from 257 to 256.

#### Outdoor Trails and Observation Deck

Applicant proposes to add trails within the area of the conservation easement and wetlands. The area is currently open meadow with scattered small trees. In total, Applicant proposes approximately ¼ miles of trails, made up with a combination of 5' wide gravel paths and 5' wide elevated walkways. Applicant proposes several sitting areas along the trails. The elevated walkways are proposed over the wetland area. Applicant additionally proposes two observation decks along the trail to serve as a bird blind and sitting area. The larger observation deck will be an open overhead structure. These improvements, to the extent they are located with the conservation easement, will also require approval from the Township Council.

#### Dog Park

Applicant proposes to add a dog park in the upland area outside of the conservation area just off the loop walkway and access driveway. The area of the proposed dog park will be cleared and converted to lawn. The proposed dog park will be 1,545 square feet and enclosed using 4' heavy duty wire fence and a secure sally port at the entrance. Within the park, Applicant proposes to include a waste station and water fountain, movable seating, and dog play structures.

#### **Recreational Courts**

Applicant proposes the following recreational courts near the existing pool and renovated club locker rooms: pickleball, bocce ball, and shuffleboard. There are existing shaded areas within the vicinity of these proposed courts to allow for shading for spectators. A pergola will also be added around the outside of the pool to provide additional protection.

#### **Spruce Grove Improvements**

Within Fellowship Village, there is a shady grove of mature spruce trees referred to as "Spruce Grove." Applicant proposes to the make certain improvements to Spruce Grove, including the addition of (i) two sitting areas, (ii) 5' wide gravel paths to replace the existing asphalt paths, (iii) rustic stone piers at both entrances; and (iv) low level illumination. Pursuant to Section 21-14.4(c)2(a)(1) of the Township's Stream Buffer Conservation Requirements, the modest improvements to this recreational trail system and private parkland are permitted as-of-right within Zone 2.

#### Ephesus Pond Deck

Applicant proposes to add a 14' x 16' deck at the edge of Ephesus Pond. There will be some low level illumination installed on the deck surface. The proposed deck will complement the recently installed landscape upgrades on the pond banks, and the proposed location is highly accessible to residents, visitors and staff.

#### **Conditional Use Criteria**

As a conditional use with the R-2 zone, Applicant is required to comply with the Township's conditional use standards. The chart below lists each of the conditional use requirements, as set forth in Sec. 21-12.3(I), and the Applicant's compliance with each.

Conditional Use Requirements – Continuing Care Community in R-2 zone (§21-12.3(I))	Compliance
(1) Before the development is occupied, the developer shall produce to the Zoning Officer either a certificate of authority for the CCRC issued pursuant to N.J.S.A. 52:27D-330 et seq. (P.L. 1986, c. 103), as amended from time to time, or a letter of nonapplicability pursuant to N.J.A.C. 5:19-2.3, as amended from time to time.	Certificate of Authority issued to Fellowship Village by the Department of Community Affairs on September 13, 1993 is annexed as Exhibit N.
(2) Before receiving final site plan approval, the developer shall produce a writing from the Commissioner of the Department of Community Affairs stating that any lien which the Department has filed or may file under N.J.S.A. 52:27D-341 (P.L. 1986, c.103, §12) shall be subordinated to any lien for unpaid taxes on real property or other municipal charges, whether existing now or in the future.	The November 13, 2020 letter from the Department of Community Affairs (DCA) stating that DCA has not filed a lien against Fellowship Village is annexed as Exhibit O.
(3) Reserved	N/A
(4) The development may include the following:	Fellowship Village
(a) Independent-living units;	includes independent living units, assisted living
(b) Assisted-living units;	units, and nursing/long
(c) Nursing units;	term care units.
(d) Congregate-care units;	
(e) Long-term-care units;	
(f) Sub-acute units; and	
(g) Memory-care units.	
(5) The development shall include at least some level of each of the following uses and services for residents, which may also be available to nonresidents of the CCRC, provided that all such uses shall be entirely contained within buildings exclusively owned and controlled by the CCRC, that that no residents shall be denied access to such uses and services, and that sufficient parking shall be provided in accordance with Subsection 21-22.1:  (a) Health care, therapy, clinical, medical, and wellness service	As will be explained in testimony, Applicant provides all of these uses, and will be expanding the recreation facilities offered through a new on-site fitness center.
facilities and services that may be on site or off site; such facilities may be an existing or new off-site location (subject to zoning requirements) if the applicant shows adequate plans to provide residents of the development with reasonable access;	No residents are denied access to these uses.

<ul> <li>(b) Facilities and services for providing meals for residents, with or without common dining facilities;</li> <li>(c) Therapy facilities and services;</li> <li>(d) Meeting rooms; and</li> <li>(e) Recreation facilities;</li> <li>The development may include personal, cultural, religious and other ancillary services customary to a CCRC. These services may include uses such as clinics, therapies, wellness and educational programs, theaters, performing arts programs, restaurants, and salons.</li> </ul>	Sufficient parking is provided, as shown on the submitted site plans and explained further below.
(6) The application for development shall include a statement generally describing the health-care services, meal services for assisted-living care or nursing care and therapy services that will be provided. Such statement may be, but is not required to be, in the developer's disclosure statement (or a portion of it) which is required by N.J.S.A. 52:27D-336 (P.L. 1986, c.103, §7.	The relevant portion of Applicant's Disclosure Statement, with a March 12, 2020 Effective Date of the Fourth Amendment, is annexed as Exhibit P and generally describes the healthcare services, meal services, nursing services, and therapy services provided.

### FELLOWSHIP SENIOR LIVING, INC. RESOLUTION

The undersigned, the Secretary of Fellowship Senior Living, Inc., a New Jersey nonprofit corporation (the "Corporation"), hereby certifies that the following is a resolution duly adopted by the Board of Trustees of the Corporation at a meeting thereof, that at such meeting a quorum was present and acting throughout, and that said copy has been compared by me with the original resolution and said copy is a true transcript therefrom and that such resolution has not been modified, amended or repealed and is in full force and effect of the date hereof

WHEREAS, the Board of Directors has determined that the Corporation may undertake various improvements to the Corporation's facilities (the "New Improvements") as follows:

- Construction of a trail walkway system that is on the ground and raised with seating areas and bird blinds through wetlands areas:
- Construction of a dog park;
- Construction of a seating area and fire pit in the spruce grove in Shiloh Court;
- Construction of a walkway and deck overlooking Ephesus pond;
- Construction of a shuffle board and bocce court on either side of the pool;
- Construction of a pickleball court behind the pool;
- Construction of a new building (approximately 14,500 square feet) with two floors consisting of a main level for a Fitness Center and a lower level (below grade) for a Salon/Spa;
- Construction of a woman's locker room to replace the former fitness center which will be modified for the new use and expanded by approximately 250 square feet;
- Renovation of apartment 2102 and the two pool bathrooms to accommodate the construction of a men's locker room located generally opposite of the woman's locker room on the other side of the pool;
- Renovation of the existing medical center to accommodate the construction of a MediSpa;
- Relocation of the Art Studio to replace the former Salon/resident office; and
- Relocation of the medical center to the former activity room, store, card room, and billiard room.

RESOLVED, that the Corporation is authorized to undertake such improvements, investigations, and other actions as

are necessary or advisable to determine whether the Corporation shall undertake any or all of the New Improvements, including, without limitation, zoning analysis, site condition testing and evaluation, wetlands delineation and other environmental investigations, and architectural and cost review; and

RESOLVED, that the Corporation is hereby authorized to file such applications and permits and authorizations as are necessary or advisable for the New Improvements, including, without limitation, applications for site plan approval, wetlands delineation and building permits; and

RESOLVED, that the Corporation and the President, any Executive Vice President, any Vice President, the Treasurer, the Assistant Secretary and the Secretary of the Corporation (each an "Authorized Officer"), and each of them, are hereby authorized to execute and deliver all such certificates, documents, instruments and agreements necessary or advisable to carry out or implement the actions herein contemplated; and

RESOLVED, that this Resolution shall be filed in the Minute Book of the Corporation.

IN WITNESS WHEREOF, the undersigned has executed this Certification as of October 14, 2020.

# **EXHIBIT I**

#### **PUBLIC NOTICE**

PLEASE TAKE NOTICE THAT the Planning Board of the Township of Bernards (the "Board") will hold a hearing on \_\_\_\_\_\_ at 7:30 PM at the Municipal Building, located at 1 Collyer Lane, Basking Ridge, New Jersey 07920 for the purposes of reviewing and taking action upon the application of Fellowship Senior Living, Inc. ("Applicant"), for preliminary and final site plan approval (the "Application") for the development of certain property having a street address of 8000 Fellowship Road, known on the tax maps as Block 9301, Lot 33 (the "Property"). Fellowship Village, a continuing care retirement community, currently operates at the Property. The Property is located within the R-2 residential zoning district, where Fellowship Village is a permitted conditional use.

Applicant is seeking preliminary and final major site plan approval in connection with proposed improvements to Fellowship Village. Applicant proposes to construct a new fitness center and salon addition, and add certain outdoor improvements. Applicant proposes the construction of a new, two-floor, 14,447 square foot structure to serve as a fitness center and salon. This addition will be connected to the main floor of the existing community center, with the main level serving as the fitness center and the lower, below grade level serving as the salon. Applicant additionally proposes minor expansions of the men's and women's changing/bathrooms, which are currently on one side of the existing pool. Applicant proposes to expand the men's changing/bathroom by incorporating the existing area of an adjacent apartment unit, and expand the women's changing/bathroom through a small, 180 s.f. addition.

Applicant proposes outdoor improvements, including approximately ¼ miles of 5' wide gravel paths and 5' wide elevated walkways within the conservation easement and wetlands area of the Property. The elevated walkway is proposed over the wetland area, and Applicant is also proposing semi-enclosed observation decks along the elevated walkway trail to serve as bird blinds and sitting areas.

Applicant additionally proposes to add an enclosed dog park in the upland area outside of the conservation area just off the loop walkway and access driveway at the Property. Further, Applicant proposes pickleball, bocce ball, and shuffleboard courts near the existing pool and renovated clubrooms.

Finally, Applicant proposes certain improvements to "Spruce Grove" and Ephesus Pond. Spruce Grove is a shady grove of mature spruce trees at the Property, and Applicant proposes to add sitting areas, replace the existing paths, add stone piers at the entrances, and add low level illumination. As to Ephesus Pond, Applicant proposes to add a 14' x 16' deck at the edge of the pond that will include some low level illumination on the deck surface.

Applicant does not request any variances as part of the Application, and the Application complies with the applicable conditional use requirements.

Applicant seeks any variances, deviations, design exceptions/waivers, submission waivers, interpretations, modifications of prior imposed conditions, and other approvals reflected on the filed plans (as same may be further amended from time to time without further notice) and as may be determined to be necessary during the review and processing of the Application.

The meeting will be held in person in the Warren Craft Meeting Room within the Municipal Building. In addition, the public will be able to view the meetings live on Optimum/Cablevision TV Channel 15 and Verizon FIOS TV Channel 35, and the meetings will also be streamed live for those interested in watching on their computers. The link to access the stream will be available at 7:30 PM by clicking on the "Watch the Meeting Live" icon on the Bernards Township website homepage. Questions and comments from the public will be accepted only during the public questions and comments periods of the meeting. Those questions or comments may be offered in person at the hearing or by calling 908-202-6426. If you are calling in, please turn off your computer/television and use Google "Duo" for your call. You will be required to provide your name and address and be sworn in prior to making comments.

When the Application is called, interested parties may appear at the hearing or any adjournment thereof either in person or by attorney, ask questions, and present evidence and offer statements or documentation that may be relevant to the Application. Interested parties may attend the in-person meeting or participate virtually using the procedures outlined in the previous paragraph. The hearing may be continued without further notice on such additional or other dates as the Board may determine.

The Application, maps, plans and related supporting materials are on file with the Board at its office in the Municipal Building, 1 Collyer Lane, Basking Ridge, New Jersey 07920. Any individual seeking to review copies of such application materials should contact the Board Secretary, Cyndi Kiefer, at 908-204-30226, Monday through Friday, 8:30AM to 4:30PM.

## **List of Prior Approvals**

October 29, 2020

Below is a list of prior approvals concerning the Property to which Applicant has knowledge:

- 5/18/1993 Preliminary and Final Site Plan Approval and Conditional Use application.
- 5/17/1994 Amended Final Site Plan Approval.
- 2/3/1998 Amended Preliminary and Final Site Plan Approval and Preliminary and Final Major Subdivision.
- 5/8/2007 Amended Preliminary and Final Site Plan Approval for addition, car pavilion and increased parking.
- 4/7/2009 Amended Preliminary and Final Site Plan Approval to enclose porches and solar roof panels.
- 6/27/2010 Amended Preliminary and Final Site Plan Approval for expansion of dining room facilities.
- 10/18/2016 Preliminary and Final Site Plan Approval, Conditional Use Approval, and Modification of Prior Approval for expansion of community center, health center, reconfiguration and expansion of parking areas for those center, and addition of two underground stormwater detention systems and modifications to stormwater retention basin located south of health center.
  - A copy of the memorializing resolution is attached.

## INSPECTION AND MAINTENANCE CONTROL PLAN FOR CJ TMI / PROPOSED BUILDING EXPANSION

#### PROJECT INFORMATION

#### a) DRAWINGS OF STORMWATER MANAGEMENT MEASURES

The proposed Facility's Stormwater Management Plans are included in its Preliminary and Final Site Development Plans which are included herein by reference.

## b) LOCATION OF STORMWATER MANAGEMENT MEASURES BY MEANS OF LATITIUDE AND LONGITUDE AND BLOCK AND LOT:

The proposed Facility's Best Management Practices Stormwater Management Facility is located on Block 9301, Lot 33 in the Township of Bernards, New Jersey. The center of the proposed facility is approximately:

LAT: 40° 34' 25.70" LONG: -74° 34' 58.42"

#### c) PREVENTATIVE CORRECTIVE MAINTENANCE TASKS AND SCHEDULES:

Refer to SECTION III for Summary of Maintenance Procedures.

#### d) COST ESTIMATE:

Refer to SECTION IV, Cost of Stormwater Management Facility Maintenance Tasks

#### e) NAME OF PERSON RESPONSIBLE FOR INSPECTIONS AND MAINTENANCE:

Company / Individual: Fellowship Senior Living, Inc. Chris Black—(908-580-3800)

Address: 8000 Fellowship Road

Basking Ridge, NJ 07920

#### PREVENTATIVE MAINTENANCE PROCEDURES

#### I. OBJECTIVES

The purpose of this preventative maintenance schedule is to assure that the Stormwater Management Facility (SWMF) remains operational and safe at all times, while minimizing the need for emergency or corrective procedures.

#### II. OVERVIEW

This comprehensive Stormwater Management Maintenance Program is comprised of several related requirements including:

- 1. Providing adequate funding, staffing, equipment, and materials.
- 2. Performing routine maintenance procedures on a regular basis.
- 3. Performing emergency maintenance procedures and repairs in a timely manner.
- 4. Conducting SWMF inspections to determine the need for and effectiveness of the maintenance work.
- 5. Providing training and instruction to maintenance personnel and inspectors.
- 6. Conducting periodic program reviews and evaluations to determine the overall effectiveness of the maintenance programs and the need for revised or additional maintenance procedures, personnel, and equipment.
- 7. Instilling pride of workmanship and a commitment to excellence in program personnel.

#### III. SUMMARY OF MAINTENANCE PROCEDURES

#### A. PREVENTATIVE MAINTENANCE PROCEDURES

### 1. Grass Cutting

A regularly scheduled program of mowing and trimming of the grass at SWMF during the growing season will help to maintain a tightly knit turf and will also help to prevent diseases, pests, and the intrusion of weeds. The actual mowing requirements of an area should be tailored to the specific site conditions, grass type, and seasonal variations in the climate. In general, grass should not be allowed to grow more than 1 to 2 inches between cuttings. Allowing the grass to grow more than this amount prior to cutting it may result in damage to the grass growing points and limit its continued healthy growth. At a minimum, once per month (if needed) mow the side slopes and berm area of the basin. Agencies such as the Somerset County Soil Conservation District can provide valuable assistance in determining optimum mowing requirements.

#### 2. Grass Maintenance

Grassed areas require periodic fertilizing, de-thatching, and soil conditioning in order to maintain healthy growth. Additionally, provisions should be made to re-seed and re-establish grass cover in areas damaged by sediment accumulation, stormwater flow, or other causes. Agencies such as the Somerset County Soil Conservation District can provide valuable assistance in establishing a suitable grass maintenance program.

#### 3. Vegetative Cover

Trees, shrubs, and ground cover require periodic maintenance, including fertilizing, pruning, and pest control in order to maintain healthy growth. Agencies such as the Somerset County Soil Conservation District can be of assistance in establishing a preventative maintenance program.

#### 4. Removal and Disposal of Trash and Debris

A regularly scheduled program of debris and trash removal from SWMFs will reduce the chance of the spillway and other basin components becoming clogged and inoperable during storm events. Additionally, removal of trash and debris will prevent possible damage to vegetated areas and eliminate potential mosquito breeding habitats. Disposal of debris and trash must comply with all local, county, state, and federal waste flow control regulations. Only suitable disposal and recycling sites should be utilized. Agencies such as the Division of Solid Waste Management of the New Jersey Department of Environmental Protection should be contacted for information on disposal regulations.

#### 5. Sediment Removals and Disposal

Accumulated sediment should be removed before it threatens the operation or storage volume of a SWMF. Disposal of sediment must comply with all local, county, state, and federal regulations. Only suitable disposal sites should be utilized. The sediment removal program in infiltration facilities must also include provisions for monitoring the porosity of the sub-base, and replacement or cleansing of the pervious materials as necessary. Agencies such at the Division of Soil Waste Management of the New Jersey Department of Environmental Protection should be contacted for information on disposal regulations.

#### 6. Elimination of Potential Mosquito Breading Habitats

The most effective mosquito control program is one that eliminates potential breeding habitats. Almost any stagnant pool of water can be attractive to mosquitoes, and the source of a large mosquito population. Ponded water in areas such as open cans and bottles, debris and sediment accumulations and areas of ground settlement provide ideal locations for mosquito breeding. A maintenance program dedicated to eliminating potential breeding areas is certainly preferable to controlling the health and nuisance effects of flying mosquitoes. The Somerset County Mosquito Control Commission can provide valuable information on establishing this maintenance program.

#### 7. Basin Maintenance

A program of monitoring the proper functioning of the infiltration basin should be established. Silt and or sediment accumulation, vegetative growth, and animal populations should be monitored on a regular basis. The timely removal of silt or sediment accumulation, proper mowing of grass and observation of animal damage can prevent more serious problems from occurring. After every storm exceeding one (1) inch of rainfall: Ensure that complete infiltration will occur within the required seventy-two (72) hour time period. If stored water fails to infiltrate seventy-two (72) hours after the end of the storm, corrective measures shall be taken. Raking or tilling by light equipment can assist in maintaining infiltration capacity and break up clogged surfaces.

As a minimum, four (4) times per year (quarterly): Inspect for clogging and excessive debris and sediment accumulation. Remove sediment (if needed) when basin is completely dry.

As a minimum, two (2) times per year: Inspect for signs of damage to structures, repair eroded areas, check for signs of petroleum contamination and remediate.

As a minimum, once per year: Inspect basin for unwanted tree growth and remove as necessary, disc or otherwise aerate the bottom of the basin to a minimum depth of six (6) inches.

After every storm exceeding one (1) inch of rainfall, inspect and, if necessary, remove and replace the K5 sand layer and accumulated sediment, to restore the original infiltration rate.

#### 7A. Drainage piping and structures

All structural components must be inspected, at least once annually, for cracking, subsidence, spalling, erosion and deterioration. Any structural defeciencies shall be addressed in a timely manner.

Components expected to receive and/or trap debris and sediment must be inspected for clogging at least four times annually, as well as after every storm exceeding 1" of rainfall.

Disposal of debris, trash, sediment and other waste material must be done at suitable disposal/recycling sites and in compliance with all applicable local, state and federal waste regulations.

#### 8. Inspection

Regularly scheduled inspections of the SWMF should be performed by qualified inspectors. The primary purpose of the inspections is to ascertain the operational condition of embankments, outlet structure, and other safety-related aspects. Inspections will also provide information on the effectiveness of regularly scheduled preventative and aesthetic maintenance procedures and will help to identify where changes are warranted. Finally, the facility inspections should be used to determine the need for and timing of corrective maintenance procedures. In addition to regularly scheduled

inspections, an informal inspection should be performed during every visit to a SWMF by maintenance or supervisory personnel. An inspection checklist and is included as part of this maintenance plan. See Infiltration Basin Maintenance for regularly scheduled maintenance inspection times.

#### 9. Reporting

The recording of all maintenance work and inspections provide valuable data on the SWMF condition. Along with the written reports, a chain of command for reporting and solving maintenance problems and addressing maintenance needs should be established. All inspection reports and records shall be retained on-site for a minimum of five (5) years.

#### B. CORRECTIVE MAINTENANCE PROCEDURES

#### 1. Removal of Debris and Sediment

Sediment, debris, and trash should be removed immediately and properly disposed of in a timely manner. At a minimum, once per month (if needed) remove litter and debris. Equipment and personnel must be available to perform the removal work on short notice. The lack of an available disposal site should not delay the removal of trash, debris, and sediment. Temporary disposal sites may be utilized if necessary.

#### 2. Structural Repairs

Structural damage to outlet and inlet structures, piping and headwalls from vandalism, flood events, or other causes must be repaired promptly. At a minimum, once per month (if needed) stabilize eroded banks and repair erosion at structures. Equipment, material, and personnel must be available to perform these repairs on short notice. The analysis of structural damage and the design and performance of structural repairs shall only be undertaken by qualified personnel.

#### 3. Embankment and Slope Repairs

Damage to embankments, and side slopes must be repaired promptly. At a minimum, once per month (if needed) stabilize eroded banks. Typical problems include settlement, scouring, cracking, sloughing, seepage and rutting. Equipment, materials and personnel must be available to perform these repairs on short notice. The immediacy of the repairs will depend upon the nature of the damage and its effects on the safety and operation of the facility. The analysis of damage and the design and performance of geotechnical repairs should only be undertaken by qualified personnel.

#### 4. Dewatering

It may be necessary to remove ponded water from within a malfunctioning SWMF. This ponding may be the result of a blocked principal outlet (detention facility), inoperable low level outlet (retention facility), loss of infiltration capacity (infiltration facility), or poor bottom drainage. Portable pumps may be necessary to remove the ponded water temporarily until a permanent solution can be implemented.

#### 5. Extermination of Mosquitoes

If neglected, a SWMF can readily become an ideal mosquito breeding area. Extermination of mosquitoes will usually require the services of an expert, such as the Somerset County Mosquito Commission. Proper procedures carried out be trained personnel can control the mosquitoes with a minimum of damage or disturbance to the environment. If mosquito control in a facility becomes necessary, the preventative maintenance program should be re-evaluated, and more emphasis placed on control of mosquito breeding habitats.

#### 6. Erosion Repair

Vegetative cover or other protective measures are necessary to prevent the loss of soil from the erosive forces of wind and water. Where a re-seeding program has not been effective in maintaining a non-erosive vegetative cover, or other factors have exposed soils, to erosion, corrective steps should be initiated to prevent further loss of soil and any subsequent danger to the stability of the facility. Soil loss can be controlled by a variety of materials and methods, including riprap, gabion lining, sod, seeding, concrete lining, and re-grading. The Somerset County Conservation District can provide assistance in recommending materials and methodologies to control erosion.

#### 7. Elimination of Trees, Brush, Roots, and Animal Burrows

Large roots can impair the stability of dams, embankments and side slopes and animal burrows. Burrows can present a safety hazard for maintenance personnel. Trees and brush with extensive woody root systems should be completely removed from dams and embankments to prevent their destabilization and the creation of seepage routes. Roots should also be completely removed to prevent their decomposition within the dam or embankment. Root voids and burrows should be plugged by filling with material similar to the existing material, and capped just below grade with stone, concrete, or other material. If plugging of the burrows does not discourage the animals form returning, further measures should be taken to either remove the animal population or to make critical areas of the facility unattractive to them.

#### 8. Snow and Ice Removal

Accumulations of snow and ice can threaten the functioning of a SWMF, particularly at inlets, outlets, and emergency spillways. Providing the equipment, materials, and personnel to monitor and remove snow and ice from these critical areas is necessary to assure the continued functioning of the facility during the winter months.

#### C. AESTHETIC MAINTENANCE PROCEDURES

#### 1. Grass Trimming

Trimming of the grass edges around structures will provide for a neat and attractive appearance of the facility. At a minimum, once per month (if needed) mow the side slopes and berm area of the basin.

#### 2. Control of Weeds

Although a regular grass maintenance program will keep weed intrusion to a minimum, some weeds will appear. Periodic weeding, either chemically or mechanically, will not only help to maintain a healthy turf, but will also keep grassed areas attractive.

#### 3. Details

Careful, meticulous and frequent attention to the performance of maintenance items such as painting, tree pruning, leaf collection, debris removal, and grass cutting will result in a SWMF that remains both functional and attractive.

#### D. CHECKLISTS AND LOGS

Included in this report are Tables and Sample Checklists and Logs regarding various aspects of SWMF maintenance and inspection.

#### III. MAINTENANCE EQUIPMENT AND MATERIALS

#### A. GRASS MAINTENANCE EQUIPMENT

- 1. Tractor-Mounted Mowers
- 2. Riding Mowers
- 3. Hand Mowers
- 4. Gas Powered Trimmers
- 5. Gas Powered Edgers
- 6. Seed Spreaders
- 7. Fertilizer Spreaders
- 8. De-Thatching Equipment
- 9. Pesticide and Herbicide Application Equipment
- 10. Grass Clipping and Leaf Collection Equipment

#### **B. VEGETATIVE COVER MAINTENANCE EQUIPMENT**

- 1. Saws
- 2. Pruning Shears
- 3. Hedge Trimmers
- 4. Wood Chippers

#### C. TRANSPORTATION EQUIPMENT

- 1. Trucks for Transportation of Materials
- 2. Trucks for Transportation of Equipment
- 3. Vehicles for Transportation of Personnel

### D. DEBRIS, TRASH AND SEDIMENT REMOVAL EQUIPMENT

- 1. Loader
- 2. Backhoe
- 3. Grader

### **E. MISCELLANEOUS EQUIPMENT**

- 1. Shovels
- 2. Rakes
- 3. Picks
- 4. Wheelbarrows
- 5. Fence Repair Tools
- 6. Painting Equipment
- 7. Gloves
- 8. Standard Mechanics Tools
- 9. Tools for Maintenance of Equipment
- 10. Office Space
- 11. Office Equipment
- 12. Telephones
- 13. Safety Equipment
- 14. Tools for Concrete Work (Mixers, Form Materials, etc.)
- 15. Welding Equipment (for Repair of Trash Racks, etc.)

#### F. MATERIALS

- 1. Topsoil
- 2. Fill
- 3. Seed
- 4. Soil Amenities (Fertilizer, Lime, etc.)

- 5. Chemicals (Pesticides, Herbicides, etc.)
- 6. Mulch
- 7. Spare Parts for Equipment
- 8. Oil and Grease for Equipment and SWMF Components
- 9. Concrete

### III. SWMF MAINTENANCE EQUIPMENT AND MATERIAL COSTS

This estimate is taken from NJDEP Stormwater Management Facilities Manual Table 6-1:

#### **GRASS MAINTENANCE EQUIPMENT**

	Purchase (dollars)	Rent (per day) (dollars)
Hand Mower	300 - 500	25 - 40
Riding Mower	3,000 - 5,000	75 - 100
Tractor Mower	15,000 - 20,000	100 - 300
Trimmer / Edger	200 - 500	25 - 35
Spreader	100 - 200	20 - 30
Chemical Sprayer	200 - 500	25 - 40

#### **VEGETATIVE COVER MAINTENANCE EQUIPMENT**

	Purchase (dollars)	Rent (per day) (dollars)
Hand Saw	15	5
Chain Saw	300 - 500	15 - 35
Pruning Shears	25	5
Shrub Trimmer	200	25 - 35
Brush Chipper	1,000 - 5,000	50 - 150

### TRANSPORTATION EQUIPMENT

	Purchase (dollars)	Lease (per month) (dollars)	Rent (per day) (dollars)
Van	10,000 - 15,000	400	50 - 70
Pickup Truck	10,000 - 15,000	400	50 - 70
Dump Truck	30,000 - 50,000	1,200	75 - 150
Light Duty Trailer	3,000 - 5,000	150	30 - 50
Heavy Duty Trailer	10,000 - 20,000	500	100 - 200

### DEBRIS, TRASH AND SEDIMENT REMOVAL EQUIPMENT

	Purchase	Lease (per month)	Rent (per day)	
	(dollars)	(dollars)	(dollars)	
Front End Loader	50,000 - 100,000	1,500 - 2,000	200 - 400	
Backhoe	30,000 - 50,000	1,200	150 - 300	
Excavator	100,000+	2,000	400 - 1,000	
Grader	100,000+	2,000	400 - 1,000	

#### MISCELLANEOUS EQUIPMENT

	Purchase (dollars)	Rent (per day) (dollars)
Shovel	15	5
Leaf Rake	15	5
Soil Rake	15	5
Pick	15	5
Wheelbarrow	100 - 200	10
Gloves	5	N/A
Portable Compressor	500 - 1,000	50 - 100
Portable Generator	500 - 1,000	50 - 100
Concrete Mixer	500 - 1,000	25 - 50
Welding Equipment	500 - 1,500	35 - 70

#### **MATERIALS**

	Purchase (dollars)
Topsoil	35 / cubic yard
Fill Soil	15 / cubic yard
Grass Seed	5 / pound
Soil Amenities (Fertilizer, Lime, etc)	0.05 / sq ft
Chemicals (Pesticides, Herbicides, etc)	10 / gallon
Mulch	25 / cubic yard
Machine / Motor Lubricants	5 / gallon
Dry Mortar Mix	4 / 50 pound bag
Concrete Delivered to Site	60 – 100 / cubic yard

#### Notes:

- 1. This estimate is an approximation of the probable construction cost in 2019 dollars. It is based upon previous construction experience and should be used as an approximate budget figure only. Marathon Engineering and Environmental Services, Inc. cannot and does not guarantee that proposals, bids, or actual costs will not vary from this opinion of probable cost.
- 2. Estimated equipment costs are based upon Industrial / Commercial grade equipment.

### IV. COST OF SWMF MAINTENANCE TASKS

Taken from NJDEP Stormwater Management Facilities Manual Table 6-2

#### PREVENTATIVE MAINTENANCE TASKS

	Small Facility (Man-Hours)	Large Facility (Man-Hours)
Grass Cutting	1	1 – 2
Grass Maintenance	0.5	1
Trash & Debris Removal	0.5	1
Sediment Removal	4	8
Mobilization	1	1
Inspection & Reporting	1	2

#### **CORRECTIVE MAINTENANCE TASKS**

	Small Facility (Man-Hours)	Large Facility (Man-Hours)
Trash & Debris Removal	4	8
Structural Repairs	2-4	40
Dewatering	4	8
Mosquito Extermination	1	2-4
Erosion Repair	4	8
Snow & Ice Removal	1	2
Mobilization	2	2

#### **AESTHETIC MAINTENANCE TASKS**

	Small Facility (Man-Hours)	Large Facility (Man-Hours)
Grass Trimming	0.5	2
Weed Control	0.5	2
Landscape Maintenance	1 - 2	2 – 4

#### Notes:

- 1. This estimate is an approximation of the man-hours as provided in the NJDEP Stormwater Facility Maintenance Manual. It is based upon previous construction experience and should be used as an approximate budget figure only. Marathon Engineering and Environmental Services, Inc. cannot and does not guarantee that proposals, bids, or actual costs will not vary from this opinion of probable cost.
- 2. Cost estimates are presented in terms of man-hours. These values should be used in conjunction with applicable personnel rates to determine labor costs for a specific program or facility.

FVG 001.01 3

### 1.0 Project Summary

The project is located adjacent to the intersection of Liberty Corner Road and Allen Road, on Fellowship Road in the township of Bernards (Basking Ridge) Somerset County, New Jersey. The project development tract on the Bernards Township Tax Maps is known as Block 9301, Lot 33 containing 72.569 acres.

The project is proposing several areas of expansion, of which two (2) will require stormwater attenuation: a Fitness Center Addition of approximately 7,270SF and the addition of several recreation courts to include a Pickleball Court, Bocce, and Shuffleboard area. The stormwater management has been designed to handle the increased runoff from these impervious surfaces, through the use of a surface infiltration basin at the recreation court areas, and a subsurface chamber infiltration system at the Fitness Center Addition. The developable portions of Lot 33 consist of primarily Hydrologic Soil Group C.

Due to the extremely minimal nature of the proposed development, the impact is expected to be negligible and the proposed stormwater BMPs proposed with this report are appropriate to reduce both the flow and quantity of runoff from the development areas. This design is compliant with the the Stormwater Management BMP.

## 2.0 Existing Conditions HydroCAD Summary Analysis

Two separate areas have been analyzed in this report, the Fitness Center Area and the Recreation/Court Area.

Table 1 – Fitness Center Area – Peak Flow (Existing Condition)

Storm Event (years)	Peak Existing Discharge/ (Allowable Discharge) (cfs)						
2	0.21 cfs / (0.11 cfs)						
10	0.49 cfs / (0.37 cfs)						
100	1.11 cfs / (0.89 cfs)						
NJDEP WQ	0.01 cfs / (N/A)						

Table 2 – Recreation/Court Area – Peak Flow (Existing Condition)

Storm Event (years)	Peak Existing Elevation (ft) / Storage (cf)
2	0.08 cfs / (0.04 cfs)
10	0.18 cfs / (0.14 cfs)
100	0.41 cfs / (0.33 cfs)
NJDEP WQ	0.01 cfs / (N/A)

#### 3.0 Developed Conditions HydroCAD Summary Analysis

All inflow hydrographs to the proposed stormwater management facilities were computed using United States Department of Agriculture (USDA) National Resource Conservation Service (NRCS) methodology as implemented within HydroCAD, version 10.00 desktop software package, by HydroCAD Software Solutions. The analysis included the use of the Delmarva Unit Hydrograph and New Jersey 24 Hour Rainfall Frequency Data, as published in Chapter 2 of the Engineering Field Handbook New Jersey Supplement, released August 2012. The NRCS Type III 24 hour distribution was used for all calculations. Curve number (CN) values where computed using the NRCS Technical Release No. 55 (TR-55), Urban Hydrology for Small Watersheds, June of 1986, within the HydroCAD software. Times of Concentration utilized for the project are based on estimated storm sewer flows or the minimum allowable time of 6 minutes as allowed by TR-55.

This report will demonstrate post development drainage areas for the site will be less than existing conditions as required. The minimum Tc utilized is 6 minutes or where higher times of concentration exist, the Tc's will be based on length/ slope and coverage condition based on TR-55 design methodology.

Two separate areas have been analyzed in this report, the Fitness Center Area and the Recreation/Court Area. (For the Fitness Center – the peak storage is achieved with the proposed chambers, and designed infiltration at 1"/hr within the subsurface system.)

Table 3 – Fitness Center Area – Peak Flow (Proposed Condition)

Storm Event (years)	Peak Existing Discharge/ (Allowable Discharge) (cfs)
2	0.06 cfs / (0.11 cfs)
10	0.06 cfs / (0.37 cfs)
100	0.07 cfs / (0.89 cfs)
NJDEP WQ	0.00 cfs / (N/A)

Table 4 – Recreation/Court Area – Peak Flow (Proposed Condition)

Storm Event (years)	Peak Existing Elevation (ft) / Storage (cf)
2	0.02 cfs / (0.04 cfs)
10	0.02 cfs / (0.14 cfs)
100	0.21 cfs / (0.33 cfs)
NJDEP WQ	0.00 cfs / (N/A)

#### 4.0 Water Quality

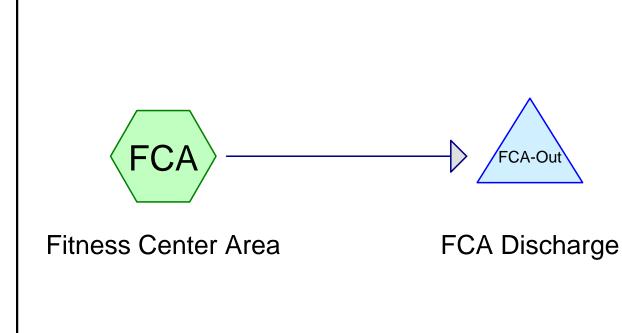

In accordance with N.J.A.C. 7:8-5.5, the water quality regulations require the removal of 80% of the Total Suspended Solids (TSS) from the runoff from the increase in vehicle trafficked impervious surface generated by the water quality design storm (defined as 1.25 inches of rainfall over 2 hours).

#### **Site TSS Removal Summary**

The runoff from the recreation courts is proposed to be attenuated in an infiltration basin which provides 80% TSS Removal. The runoff from the fitness center building expansion is considered "clean" and does not require TSS Removal.

# Fellowship Village - Fitness Center

Bernards, NJ

#### STORMTECH CHAMBER SPECIFICATIONS

- CHAMBERS SHALL BE STORMTECH MC-4500 OR APPROVED EQUAL.
- 2. CHAMBERS SHALL BE MANUFACTURED FROM VIRGIN, IMPACT-MODIFIED POLYPROPYLENE COPOLYMERS.
- CHAMBER ROWS SHALL PROVIDE CONTINUOUS, UNOBSTRUCTED INTERNAL SPACE WITH NO INTERNAL SUPPORT PANELS THAT WOULD IMPEDE FLOW OR LIMIT ACCESS FOR INSPECTION.
- 4. THE STRUCTURAL DESIGN OF THE CHAMBERS, THE STRUCTURAL BACKFILL, AND THE INSTALLATION REQUIREMENTS SHALL ENSURE THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET FOR: 1) LONG-DURATION DEAD LOADS AND 2) SHORT-DURATION LIVE LOADS, BASED ON THE AASHTO DESIGN TRUCK WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCES.
- CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED
  WALL STORMWATER COLLECTION CHAMBERS".
- CHAMBERS SHALL BE DESIGNED AND ALLOWABLE LOADS DETERMINED IN ACCORDANCE WITH ASTM F2787, "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
- 7. ONLY CHAMBERS THAT ARE APPROVED BY THE SITE DESIGN ENGINEER WILL BE ALLOWED. THE CHAMBER MANUFACTURER SHALL SUBMIT THE FOLLOWING UPON REQUEST TO THE SITE DESIGN ENGINEER FOR APPROVAL BEFORE DELIVERING CHAMBERS TO THE PROJECT SITE:
  - a. A STRUCTURAL EVALUATION SEALED BY A REGISTERED PROFESSIONAL ENGINEER THAT DEMONSTRATES THAT THE SAFETY FACTORS ARE GREATER THAN OR EQUAL TO 1.95 FOR DEAD LOAD AND 1.75 FOR LIVE LOAD, THE MINIMUM REQUIRED BY ASTM F2787 AND BY AASHTO FOR THERMOPLASTIC PIPE.
  - b. A STRUCTURAL EVALUATION SEALED BY A REGISTERED PROFESSIONAL ENGINEER THAT DEMONSTRATES THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET. THE 50 YEAR CREEP MODULUS DATA SPECIFIED IN ASTM F2418 MUST BE USED AS PART OF THE AASHTO STRUCTURAL EVALUATION TO VERIFY LONG TERM REPERFEMENT.
  - c. STRUCTURAL CROSS SECTION DETAIL ON WHICH THE STRUCTURAL EVALUATION IS BASED.
- 8. CHAMBERS AND END CAPS SHALL BE PRODUCED AT AN ISO 9001 CERTIFIED MANUFACTURING FACILITY.

#### IMPORTANT - NOTES FOR THE BIDDING AND INSTALLATION OF MC-4500 CHAMBER SYSTEM

- STORMTECH MC-4500 CHAMBERS SHALL NOT BE INSTALLED UNTIL THE MANUFACTURER'S REPRESENTITIVE HAS COMPLETED A PRE-CONSTRUCTION MEETING WITH THE INSTALLERS.
- 2. STORMTECH MC-4500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
- 3. CHAMBERS ARE NOT TO BE BACKFILLED WITH A DOZER OR EXCAVATOR SITUATED OVER THE CHAMBERS.

STORMTECH RECOMMENDS 3 BACKFILL METHODS:

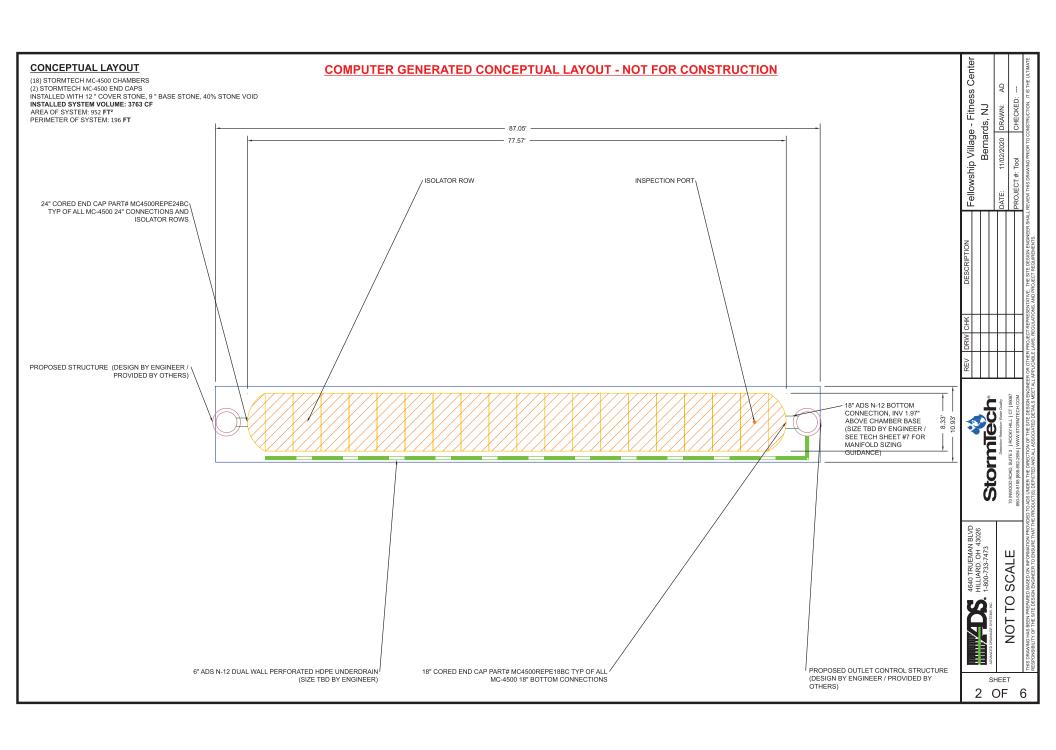

- STONESHOOTER LOCATED OFF THE CHAMBER BED.
- BACKFILL AS ROWS ARE BUILT USING AN EXCAVATOR ON THE FOUNDATION STONE OR SUBGRADE.
   BACKFILL FROM OUTSIDE THE EXCAVATION USING A LONG BOOM HOE OR EXCAVATOR.
- BACKI ILET KOM OUTSIDE
- 4. THE FOUNDATION STONE SHALL BE LEVELED AND COMPACTED PRIOR TO PLACING CHAMBERS
- 5. JOINTS BETWEEN CHAMBERS SHALL BE PROPERLY SEATED PRIOR TO PLACING STONE.
- 6. MAINTAIN MINIMUM 9" (230 mm) SPACING BETWEEN THE CHAMBER ROWS.
- 7. INLET AND OUTLET MANIFOLDS MUST BE INSERTED A MINIMUM OF 12" (300 mm) INTO CHAMBER END CAPS
- EMBEDMENT STONE SURROUNDING CHAMBERS MUST BE A CLEAN, CRUSHED, ANGULAR STONE 3/4-2" (20-50 mm) MEETING THE AASHTO M43
  DESIGNATION OF #3 OR #4.
- 9. STONE SHALL BE BROUGHT UP EVENLY AROUND CHAMBERS SO AS NOT TO DISTORT THE CHAMBER SHAPE. STONE DEPTHS SHOULD NEVER DIFFER BY MORE THAN 12" (300 mm) BETWEEN ADJACENT CHAMBER ROWS.
- 10. STONE MUST BE PLACED ON THE TOP CENTER OF THE CHAMBER TO ANCHOR THE CHAMBERS IN PLACE AND PRESERVE ROW SPACING
- ADS RECOMMENDS THE USE OF "FLEXSTORM CATCH IT" INSERTS DURING CONSTRUCTION FOR ALL INLETS TO PROTECT THE SUBSURFACE STORMWATER MANAGEMENT SYSTEM FROM CONSTRUCTION SITE RUNOFF.

#### NOTES FOR CONSTRUCTION EQUIPMENT

- 1. STORMTECH MC-4500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
- 2. THE USE OF EQUIPMENT OVER MC-4500 CHAMBERS IS LIMITED:
  - NO EQUIPMENT IS ALLOWED ON BARE CHAMBERS.
  - NO RUBBER TIRED LOADER, DUMP TRUCK, OR EXCAVATORS ARE ALLOWED UNTIL PROPER FILL DEPTHS ARE REACHED IN ACCORDANCE
    WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE".
  - WEIGHT LIMITS FOR CONSRUCTION EQUIPMENT CAN BE FOUND IN THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE"
- 3. FULL 36" (900 mm) OF STABILIZED COVER MATERIALS OVER THE CHAMBERS IS REQUIRED FOR DUMP TRUCK TRAVEL OR DUMPING.

USE OF A DOZER TO PUSH EMBEDMENT STONE BETWEEN THE ROWS OF CHAMBERS MAY CAUSE DAMAGE TO CHAMBERS AND IS NOT AN ACCEPTABLE BACKFILL METHOD. ANY CHAMBERS DAMAGED BY USING THE "DUMP AND PUSH" METHOD ARE NOT COVERED UNDER THE STORMTECH STANDARD WARRANTY.

CONTACT STORMTECH AT 1-888-892-2694 WITH ANY QUESTIONS ON INSTALLATION REQUIREMENTS OR WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT.

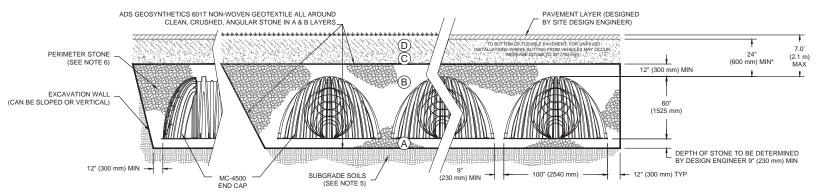

#### **ACCEPTABLE FILL MATERIALS: STORMTECH MC-4500 CHAMBER SYSTEMS**

	MATERIAL LOCATION	DESCRIPTION	AASHTO MATERIAL CLASSIFICATIONS	COMPACTION / DENSITY REQUIREMENT
D	FINAL FILL: FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE: NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER SITE DESIGN ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
С	INITIAL FILL: FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE (B' LAYER) TO 24" (600 mm) ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES OR PROCESSED AGGREGATE. MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	OR	BEGIN COMPACTIONS AFTER 24" (600 mm) OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 12" (300 mm) MAX LIFTS TO A MIN. 95% PROCTOR DENSITY FOR WELL GRADED MATERIAL AND 95% RELATIVE DENSITY FOR PROCESSED AGGREGATE MATERIALS.
В	EMBEDMENT STONE: FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE, NOMINAL SIZE DISTRIBUTION BETWEEN 3/4-2 INCH (20-50 mm)	AASHTO M43 <sup>1</sup> 3, 4	NO COMPACTION REQUIRED.
А	FOUNDATION STONE: FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE, NOMINAL SIZE DISTRIBUTION BETWEEN 3/4-2 INCH (20-50 mm)	AASHTO M43 <sup>1</sup> 3, 4	PLATE COMPACT OR ROLL TO ACHIEVE A FLAT SURFACE. 2 3

#### PLEASE NOTE

- THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".
- 2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 9" (230 mm) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR.

  3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION. FOR STANDARD DESIGN LOAD CONDITIONS. A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION.
- 3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.

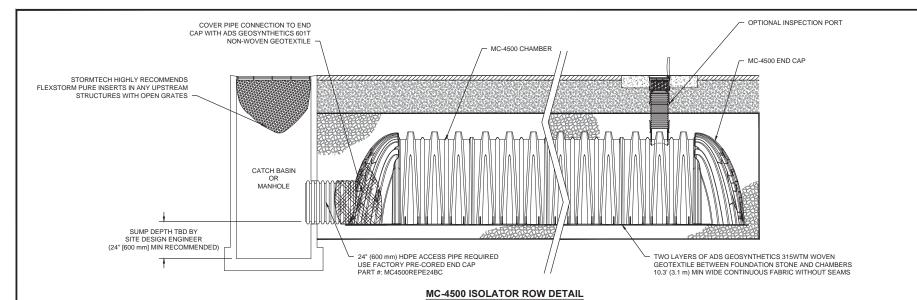

#### NOTES:

- 1. MC-4500 CHAMBERS SHALL CONFORM TO THE REQUIREMENTS OF ASTM F2418 "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
- 2. MC-4500 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
- 3. "ACCEPTABLE FILL MATERIALS" TABLE ABOVE PROVIDES MATERIAL LOCATIONS, DESCRIPTIONS, GRADATIONS, AND COMPACTION REQUIREMENTS FOR FOUNDATION, EMBEDMENT, AND FILL MATERIALS.
- I. THE "SITE DESIGN ENGINEER" REFERS TO THE ENGINEER RESPONSIBLE FOR THE DESIGN AND LAYOUT OF THE STORMTECH CHAMBERS FOR THIS PROJECT.
- 5. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS.
- 6. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
- 7. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.

3 OF

#### **INSPECTION & MAINTENANCE**

STEP 1) INSPECT ISOLATOR ROW FOR SEDIMENT

A. INSPECTION PORTS (IF PRESENT)

REMOVE/OPEN LID ON NYLOPLAST INLINE DRAIN

REMOVE AND CLEAN FLEXSTORM FILTER IF INSTALLED

USING A FLASHLIGHT AND STADIA ROD, MEASURE DEPTH OF SEDIMENT AND RECORD ON MAINTENANCE LOG

LOWER A CAMERA INTO ISOLATOR ROW FOR VISUAL INSPECTION OF SEDIMENT LEVELS (OPTIONAL)

IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.

B. ALL ISOLATOR ROWS

REMOVE COVER FROM STRUCTURE AT UPSTREAM END OF ISOLATOR ROW

USING A FLASHLIGHT. INSPECT DOWN THE ISOLATOR ROW THROUGH OUTLET PIPE

) MIRRORS ON POLES OR CAMERAS MAY BE USED TO AVOID A CONFINED SPACE ENTRY

ii) FOLLOW OSHA REGULATIONS FOR CONFINED SPACE ENTRY IF ENTERING MANHOLE

IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.

CLEAN OUT ISOLATOR ROW USING THE JETVAC PROCESS

A. A FIXED CULVERT CLEANING NOZZLE WITH REAR FACING SPREAD OF 45° (1.1 m) OR MORE IS PREFERRED

R APPLY MULTIPLE PASSES OF JETVAC UNTIL BACKFLUSH WATER IS CLEAN

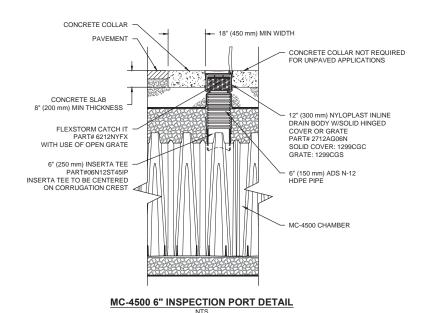

VACUUM STRUCTURE SUMP AS REQUIRED

STEP 3) REPLACE ALL COVERS, GRATES, FILTERS, AND LIDS; RECORD OBSERVATIONS AND ACTIONS.

INSPECT AND CLEAN BASINS AND MANHOLES UPSTREAM OF THE STORMTECH SYSTEM.

#### **NOTES**

- 1. INSPECT EVERY 6 MONTHS DURING THE FIRST YEAR OF OPERATION. ADJUST THE INSPECTION INTERVAL BASED ON PREVIOUS OBSERVATIONS OF SEDIMENT ACCUMULATION AND HIGH WATER ELEVATIONS.
- 2. CONDUCT JETTING AND VACTORING ANNUALLY OR WHEN INSPECTION SHOWS THAT MAINTENANCE IS NECESSARY.

Natural Resources

Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

# **Custom Soil Resource** Report for **Somerset** County, New **Jersey**

Fellowship Village

## **Preface**

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2 053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

# Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

#### MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24.000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Somerset County, New Jersey Survey Area Data: Version 18, Jun 1, 2020

Soil map units are labeled (as space allows) for map scales 1:50.000 or larger.

Date(s) aerial images were photographed: Jul 26, 2019—Jul 31, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
PbpAt	Parsippany silt loam, 0 to 3 percent slopes, frequently flooded	2.4	3.3%
PeoB	Penn channery silt loam, 2 to 6 percent slopes	35.4	48.8%
PeoC	Penn channery silt loam, 6 to 12 percent slopes	10.5	14.5%
RehA	Reaville silt loam, 0 to 2 percent slopes	23.9	32.9%
WATER	Water	0.4	0.5%
Totals for Area of Interest	'	72.6	100.0%

## **Map Unit Descriptions**

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

#### Custom Soil Resource Report

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

#### **Somerset County, New Jersey**

#### PbpAt—Parsippany silt loam, 0 to 3 percent slopes, frequently flooded

#### **Map Unit Setting**

National map unit symbol: 1j501 Elevation: 150 to 220 feet

Mean annual precipitation: 30 to 64 inches Mean annual air temperature: 46 to 79 degrees F

Frost-free period: 131 to 178 days

Farmland classification: Not prime farmland

#### **Map Unit Composition**

Parsippany, frequently flooded, and similar soils: 90 percent

Minor components: 10 percent

Estimates are based on observations, descriptions, and transects of the mapunit.

#### **Description of Parsippany, Frequently Flooded**

#### Setting

Landform: Lake terraces Down-slope shape: Linear Across-slope shape: Linear

Parent material: Fine glaciolacustrine deposits derived from basalt, shale and

granitic gneiss material

#### **Typical profile**

Oi - 0 to 1 inches: slightly decomposed plant material

A1 - 1 to 4 inches: silt loam A2 - 4 to 7 inches: silt loam

BAt - 7 to 11 inches: silty clay loam
Btg1 - 11 to 17 inches: silty clay loam
Btg2 - 17 to 22 inches: silty clay
Bt1 - 22 to 32 inches: silty clay
Bt2 - 32 to 36 inches: silty clay

BCg - 36 to 41 inches: fine sandy loam Cg1 - 41 to 53 inches: loamy fine sand Cg2 - 53 to 64 inches: loamy sand

#### **Properties and qualities**

Slope: 0 to 3 percent

Depth to restrictive feature: More than 80 inches

Drainage class: Poorly drained Runoff class: Negligible

Capacity of the most limiting layer to transmit water (Ksat): Moderately low to

moderately high (0.06 to 0.20 in/hr)

Depth to water table: About 0 to 6 inches

Frequency of flooding: FrequentNone

Frequency of ponding: Frequent

Available water capacity: Moderate (about 8.4 inches)

#### Interpretive groups

Land capability classification (irrigated): None specified

Land capability classification (nonirrigated): 3e

Hydrologic Soil Group: C Hydric soil rating: No

#### **Minor Components**

#### Klinesville

Percent of map unit: 5 percent

Landform: Hills

Landform position (two-dimensional): Shoulder

Down-slope shape: Linear Across-slope shape: Convex

Hydric soil rating: No

#### Reaville

Percent of map unit: 5 percent

Landform: Interfluves
Down-slope shape: Convex
Across-slope shape: Linear
Hydric soil rating: No

#### Readington

Percent of map unit: 5 percent

Landform: Hillsides

Landform position (two-dimensional): Backslope Landform position (three-dimensional): Base slope Down-slope shape: Linear Across-slope shape: Linear Hydric soil rating: No

#### RehA—Reaville silt loam, 0 to 2 percent slopes

#### **Map Unit Setting**

National map unit symbol: 1j535 Elevation: 300 to 1,000 feet

Mean annual precipitation: 30 to 64 inches
Mean annual air temperature: 46 to 79 degrees F

Frost-free period: 131 to 178 days

Farmland classification: Farmland of statewide importance

#### **Map Unit Composition**

Reaville and similar soils: 85 percent Minor components: 15 percent

Estimates are based on observations, descriptions, and transects of the mapunit.

#### **Description of Reaville**

#### Setting

Landform: Interfluves
Down-slope shape: Convex
Across-slope shape: Linear

Parent material: Interbedded fine-grained fine-loamy residuum weathered from

sandstone and siltstone and/or shale

#### Typical profile

A - 0 to 10 inches: silt loam

BA - 10 to 15 inches: channery silt loam
Bt - 15 to 22 inches: channery silt loam
C - 22 to 28 inches: very channery silt loam
R - 28 to 80 inches: weathered bedrock

#### Properties and qualities

Slope: 0 to 2 percent

Depth to restrictive feature: 20 to 39 inches to lithic bedrock

Drainage class: Somewhat poorly drained

Runoff class: Very high

Capacity of the most limiting layer to transmit water (Ksat): Moderately low to

moderately high (0.06 to 0.20 in/hr) Depth to water table: About 12 to 24 inches

Frequency of flooding: None Frequency of ponding: None

Available water capacity: Low (about 3.6 inches)

#### Interpretive groups

Land capability classification (irrigated): None specified

Land capability classification (nonirrigated): 3w

Hydrologic Soil Group: C

#### Custom Soil Resource Report

Hydric soil rating: No

#### **Minor Components**

#### Readington

Percent of map unit: 4 percent

Landform: Hillsides

Landform position (two-dimensional): Footslope Landform position (three-dimensional): Base slope

Down-slope shape: Linear Across-slope shape: Linear Hydric soil rating: No

#### **Bucks**

Percent of map unit: 4 percent

Landform: Hills

Landform position (two-dimensional): Backslope Landform position (three-dimensional): Side slope

Down-slope shape: Linear Across-slope shape: Convex Hydric soil rating: No

#### Reaville, poorly drained

Percent of map unit: 4 percent

Landform: Depressions

Landform position (two-dimensional): Toeslope Landform position (three-dimensional): Base slope

Down-slope shape: Concave Across-slope shape: Concave

Hydric soil rating: Yes

#### Croton

Percent of map unit: 3 percent

Landform: Depressions

Landform position (two-dimensional): Toeslope Landform position (three-dimensional): Base slope

Down-slope shape: Concave Across-slope shape: Concave

Hydric soil rating: Yes

#### **WATER—Water**

#### **Map Unit Setting**

National map unit symbol: Idsl

Mean annual precipitation: 30 to 64 inches
Mean annual air temperature: 46 to 79 degrees F

Frost-free period: 131 to 178 days

Farmland classification: Not prime farmland

#### **Map Unit Composition**

Water: 100 percent

#### STORMTECH CHAMBER SPECIFICATIONS

- CHAMBERS SHALL BE STORMTECH MC-4500 OR APPROVED EQUAL
- CHAMBERS SHALL BE MANUFACTURED FROM VIRGIN, IMPACT-MODIFIED POLYPROPYLENE COPOLYMERS.
- PANELS THAT WOULD IMPEDE FLOW OR LIMIT ACCESS FOR INSPECTION. THE STRUCTURAL DESIGN OF THE CHAMBERS, THE STRUCTURAL BACKFILL, AND THE INSTALLATION REQUIREMENTS SHALL ENSURE THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET FOR: 1) LONG-DURATION DEAD LOADS AND 2) SHORT-DURATION LIVE LOADS, BASED ON THE AASHTO DESIGN TRUCK WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE

CHAMBER ROWS SHALL PROVIDE CONTINUOUS, UNOBSTRUCTED INTERNAL SPACE WITH NO INTERNAL SUPPORT

- CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
- CHAMBERS SHALL BE DESIGNED AND ALLOWABLE LOADS DETERMINED IN ACCORDANCE WITH ASTM F2787, "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER
- ONLY CHAMBERS THAT ARE APPROVED BY THE SITE DESIGN ENGINEER WILL BE ALLOWED. THE CHAMBER MANUFACTURER SHALL SUBMIT THE FOLLOWING UPON REQUEST TO THE SITE DESIGN ENGINEER FOR APPROVAL BEFORE DELIVERING CHAMBERS TO THE PROJECT SITE:
- a. A STRUCTURAL EVALUATION SEALED BY A REGISTERED PROFESSIONAL ENGINEER THAT DEMONSTRATES THAT THE SAFETY FACTORS ARE GREATER THAN OR EQUAL TO 1.95 FOR DEAD LOAD AND 1.75 FOR LIVE LOAD, THE MINIMUM REQUIRED BY ASTM F2787 AND BY AASHTO FOR THERMOPLASTIC PIPE.
- b. A STRUCTURAL EVALUATION SEALED BY A REGISTERED PROFESSIONAL ENGINEER THAT DEMONSTRATES THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12. ARE MET. THE 50 YEAR CREEP MODULUS DATA SPECIFIED IN ASTM F2418 MUST BE USED AS PART OF THE AASHTO STRUCTURAL EVALUATION TO VERIFY LONG-TERM PERFORMANCE.
- c. STRUCTURAL CROSS SECTION DETAIL ON WHICH THE STRUCTURAL EVALUATION IS BASED. 8 CHAMBERS AND END CAPS SHALL BE PRODUCED AT AN ISO 9001 CERTIFIED MANUFACTURING FACILITY
- STORMTECH MC-4500 CHAMBERS SHALL NOT BE INSTALLED UNTIL THE MANUFACTURER'S REPRESENTITIVE HAS
- STORMTECH MC-4500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE" ^.I
- 3. CHAMBERS ARE NOT TO BE BACKFILLED WITH A DOZER OR EXCAVATOR SITUATED OVER THE CHAMBERS. STORMTECH RECOMMENDS 3 BACKFILL METHODS:
- STONESHOOTER LOCATED OFF THE CHAMBER BED BACKFILL AS ROWS ARE BUILT USING AN EXCAVATOR ON THE FOUNDATION STONE OR SUBGRADE. BACKFILL FROM OUTSIDE THE EXCAVATION USING A LONG BOOM HOE OR EXCAVATOR.
- THE FOUNDATION STONE SHALL BE LEVELED AND COMPACTED PRIOR TO PLACING CHAMBERS.
- 5. JOINTS BETWEEN CHAMBERS SHALL BE PROPERLY SEATED PRIOR TO PLACING STONE.

COMPLETED A PRE-CONSTRUCTION MEETING WITH THE INSTALLERS

- MAINTAIN MINIMUM 9" (230 mm) SPACING BETWEEN THE CHAMBER ROWS.^J
- INLET AND OUTLET MANIFOLDS MUST BE INSERTED A MINIMUM OF 12" (300 mm) INTO CHAMBER END CAPS. EMBEDMENT STONE SURROUNDING CHAMBERS MUST BE A CLEAN, CRUSHED, ANGULAR STONE 3/4-2" (20-50 mm)
- MEETING THE AASHTO M43 DESIGNATION OF #3 OR #4.^J STONE SHALL BE BROUGHT UP EVENLY AROUND CHAMBERS SO AS NOT TO DISTORT THE CHAMBER SHAPE. STONE DEPTHS SHOULD NEVER DIFFER BY MORE THAN 12" (300 mm) BETWEEN ADJACENT CHAMBER ROWS. 'J
- STONE MUST BE PLACED ON THE TOP CENTER OF THE CHAMBER TO ANCHOR THE CHAMBERS IN PLACE AND
- ADS RECOMMENDS THE USE OF "FLEXSTORM CATCH IT" INSERTS DURING CONSTRUCTION FOR ALL INLETS TO PROTECT THE SUBSURFACE STORMWATER MANAGEMENT SYSTEM FROM CONSTRUCTION SITE RUNOFF.

#### NOTES FOR CONSTRUCTION EQUIPMENT

- STORMTECH MC-4500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 THE USE OF EQUIPMENT OVER MC-4500 CHAMBERS IS LIMITED: NO EQUIPMENT IS ALLOWED ON BARE CHAMBERS.
- NO RUBBER TIRED LOADER, DUMP TRUCK, OR EXCAVATORS ARE ALLOWED UNTIL PROPER FILL DEPTHS ARE REACHED IN ACCORDANCE WITH THE "STORMTECH MC-3500/MC-4500 CONSTRUCTION GUIDE". WEIGHT LIMITS FOR CONSRUCTION EQUIPMENT CAN BE FOUND IN THE "STORMTECH MC-3500/MC-4500"
- CONSTRUCTION GUIDE" 3. FULL 36" (900 mm) OF STABILIZED COVER MATERIALS OVER THE CHAMBERS IS REQUIRED FOR DUMP TRUCK

USE OF A DOZER TO PUSH EMBEDMENT STONE BETWEEN THE ROWS OF CHAMBERS MAY CAUSE DAMAGE TO CHAMBERS AND IS NOT AN ACCEPTABLE BACKFILL METHOD. ANY CHAMBERS DAMAGED BY USING THE "DUMP AND PUSH" METHOD ARE NOT COVERED UNDER THE STORMTECH STANDARD WARRANTY A.I. CONTACT STORMTECH AT 1-888-892-2694 WITH ANY QUESTIONS ON INSTALLATION REQUIREMENTS OR WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT.

#### **INSPECTION & MAINTENANCE**

TRAVEL OR DUMPING

STEP 1) INSPECT ISOLATOR ROW FOR SEDIMEN A. INSPECTION PORTS (IF PRESENT)

. VACUUM STRUCTURE SUMP AS REQUIRED

- A.1. REMOVE/OPEN LID ON NYLOPLAST INLINE DRAIN A.2. REMOVE AND CLEAN FLEXSTORM FILTER IF INSTALLED A.3. USING A FLASHLIGHT AND STADIA ROD, MEASURE DEPTH OF SEDIMENT AND RECORD ON MAINTENANCE LOG
- A.4. LOWER A CAMERA INTO ISOLATOR ROW FOR VISUAL INSPECTION OF SEDIMENT LEVELS (OPTIONAL) A.5. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3. B. ALL ISOLATOR ROWS B.1. REMOVE COVER FROM STRUCTURE AT UPSTREAM END OF ISOLATOR ROW
- B.2. USING A FLASHLIGHT, INSPECT DOWN THE ISOLATOR ROW THROUGH OUTLET PIPE^Ji) MIRRORS ON POLES OR CAMERAS MAY BE USED TO AVOID A CONFINED SPACE ENTRY^Jii) FOLLOW OSHA REGULATIONS FOR CONFINED SPACE ENTRY IF ENTERING MANHOLE B.3. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.
- STEP 2) CLEAN OUT ISOLATOR ROW USING THE JETVAC PROCESS A. A FIXED CULVERT CLEANING NOZZLE WITH REAR FACING SPREAD OF 45" (1.1 m) OR MORE IS PREFERRED . APPLY MULTIPLE PASSES OF JETVAC UNTIL BACKFLUSH WATER IS CLEAN
- STEP 3) REPLACE ALL COVERS, GRATES, FILTERS, AND LIDS; RECORD OBSERVATIONS AND ACTIONS.

STEP 4) INSPECT AND CLEAN BASINS AND MANHOLES UPSTREAM OF THE STORMTECH SYSTEM

INSPECT EVERY 6 MONTHS DURING THE FIRST YEAR OF OPERATION. ADJUST THE INSPECTION INTERVAL BASED ON PREVIOUS OBSERVATIONS OF SEDIMENT ACCUMULATION AND HIGH WATER ELEVATIONS.^J

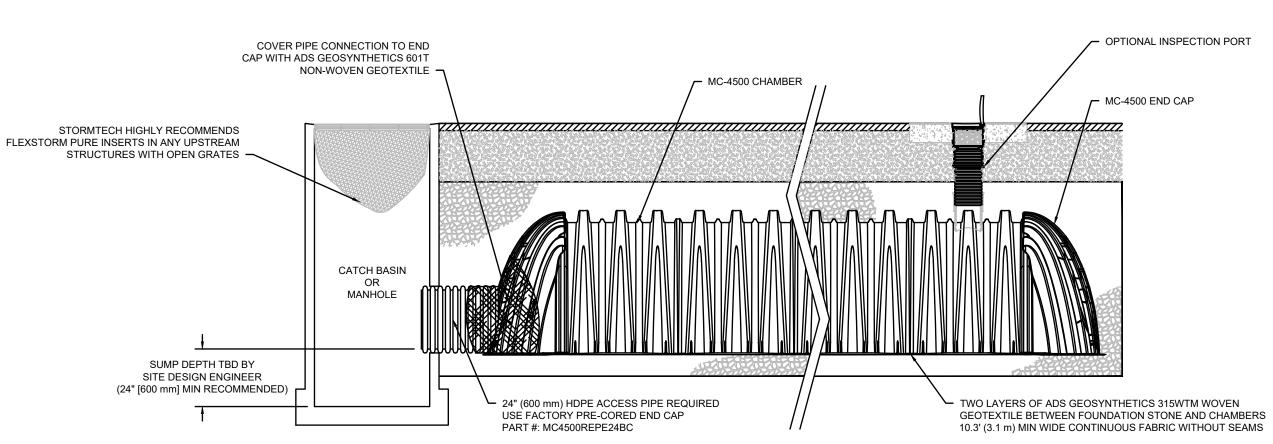

2. CONDUCT JETTING AND VACTORING ANNUALLY OR WHEN INSPECTION SHOWS THAT MAINTENANCE IS NECESSARY

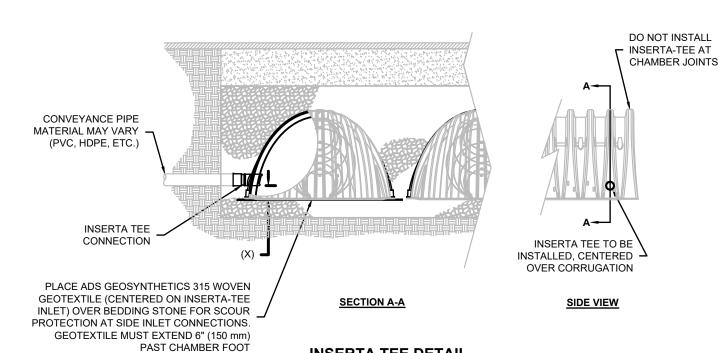

#### ADS GEOSYNTHETICS 601T NON-WOVEN GEOTEXTILE ALL AROUND PAVEMENT LAYER (DESIGNED CLEAN, CRUSHED, ANGULAR STONE IN A & B LAYERS BY SITE DESIGN ENGINEER) 'TO BOTTOM OF FLEXIBLE PAVEMENT. EXISTING UTILITY INFORMATION SHOWN ON THESE PLANS IS FURNISHED BY THE UTILITY COMPANIES AND/OR THE SURVEYOR AND THE ACCURACY THEREOF IS NOT THE RESPONSIBILITY OF MARATHON ENGINEERING & ENVIRONMENTAL SERVICES, INC. IT IS THE RESPONSIBILITY OF THE OWNERS AND/OR CONTRACTOR TO CALL 1-800-272-1000 FOR FIELD LOCATION OF UNDERGROUND UTILITIES PRIOR TO CONSTRUCTION.

#### GENERAL NOTES

THE SOIL CONSERVATION DISTRICT SHALL BE NOTIFIED 48 HOURS PRIOR TO ANY LAND DISTURBANCE.

#### SOMERSET-UNION COUNTY SOIL CONSERVATION DISTRICT 308 MILLTOWN ROAD BRIDGEWATER, NJ 08807

2. SOIL EROSION AND SEDIMENT CONTROL PRACTICES ON THIS PLAN SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE CURRENT STANDARDS FOR SOIL EROSION AND SEDIMENT CONTROL IN NEW JERSEY.

PHONE (908) 526-2701 FAX (908) 575-3977

- 3. A COPY OF THE CERTIFIED SOIL EROSION AND SEDIMENT CONTROL PLAN INCLUDING REVISION THEREOF MUST BE MAINTAINED ON THE PROJECT SITE DURING CONSTRUCTION.
- 4. IN NO CASE SHALL THE CERTIFICATION OF THE PROJECT BY THE DISTRICT EXTEND BEYOND THREE AND ONE HALF YEARS OF THE ORIGINAL CERTIFICATION DATE.
- 5. PRIOR TO ANY GRADING OPERATION AND /OR INSTALLATION OF PROPOSED STRUCTURES OR UTILITIES. A NJPDES REQUEST FOR AUTHORIZATION ("RFA") FORM FOR STORMWATER DISCHARGE ASSOCIATED WITH CONSTRUCTION ACTIVITY MUST BE FILED WITH NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION ("NJDEP") IF THE CONSTRUCTION WILL DISTURB MORE THAN ONE ACRE. THE APPLICATION MUST BE COMPLETED BY THE ENTITY RESPONSIBLE FOR MAINTENANCE OF SOIL EROSION CONTROL MEASURES DURING CONSTRUCTION, TYPICALLY THE DEVELOPER OR CONTRACTOR. THE APPLICATION IS A SIMPLE FORM FILED ON THE NJDEP WEBSITE USING PROJECT CODES PROVIDED BY THE SOIL CONSERVATION DISTRICT. IF REQUIRED, THE ENGINEER WILL ASSIST THE DEVELOPER OR CONTRACTOR BY PROVIDING TECHNICAL INFORMATION TO COMPLETE THE APPLICATION.
- 6. ALL APPLICABLE SOIL EROSION AND SEDIMENT CONTROL PRACTICES SHALL BE IN PLACE PRIOR TO ANY GRADING OPERATION AND/OR INSTALLATION OF PROPOSED STRUCTURES OR UTILITIES.
- 7. ANY CHANGES TO THE SITE PLAN WILL REQUIRE THE SUBMISSION OF A REVISED SOIL EROSION AND SEDIMENT CONTROL PLAN TO THE DISTRICT. THE REVISED PLAN MUST BE IN ACCORDANCE WITH THE CURRENT NEW JERSEY STANDARDS FOR SOIL EROSION AND SEDIMENT CONTROL.
- 8. THE CONTRACTOR SHALL PERFORM ALL WORK, FURNISH ALL MATERIALS AND INSTALL ALL MEASURES REQUIRED TO REASONABLY CONTROL SOIL EROSION RESULTING FROM CONSTRUCTION OPERATIONS AND PREVENT EXCESSIVE FLOW OF SEDIMENT FROM THE CONSTRUCTION SITE.
- 9. THE DISTRICT MAY REQUIRE ADDITIONAL SOIL EROSION MEASURES TO BE INSTALLED, AS DETERMINED BY THE DISTRICT
- 10. OFFSITE LAND DISTURBANCE MAY REQUIRE ADDITIONAL SOIL EROSION AND SEDIMENT CONTROL MEASURES TO BE DETERMINED BY THE DISTRICT.
- 11. STAGED CONSTRUCTION METHODS TO MINIMIZE EXPOSED SURFACES, WHERE APPLICABLE.
- 12. THE SITE SHALL AT ALL TIMES BE GRADED AND MAINTAINED SUCH THAT STORMWATER RUNOFF IS DIVERTED TO SOIL EROSION AND SEDIMENT CONTROL FACILITIES.
- 13. SOIL EROSION AND SEDIMENT CONTROL MEASURES WILL BE INSPECTED AND MAINTAINED ON A REGULAR BASIS AND AFTER EVERY STORM EVENT.
- 14. APPLICABLE SOIL EROSION AND SEDIMENT CONTROL PRACTICES SHALL BE LEFT IN PLACE UNTIL CONSTRUCTION IS COMPLETED AND/OR THE AREA IS STABILIZED.
- 15. NJSA 4: 24-39, ET SEQ. REQUIRES THAT NO CERTIFICATE OF OCCUPANCY, TEMPORARY OR PERMANENT, BE ISSUED BEFORE ALL PROVISIONS OF THE CERTIFIED SOIL EROSION AND SEDIMENT CONTROL PLAN HAVE BEEN COMPLIED WITH PERMANENT MEASURES. ALL SITE WORK FOR THE PROJECT MUST BE COMPLETED PRIOR TO THE DISTRICT ISSUING A REPORT OF COMPLIANCE AS A PREREQUISITE TO THE ISSUANCE OF A CERTIFICATE OF OCCUPANCY BY THE MUNICIPALITY. INSPECTION FOR THE CERTIFICATE OF OCCUPANCY MUST BE SCHEDULED AT LEAST A WEEK IN ADVANCE.
- 16. NJSA 4: 24-39, ET SEQ., REQUIRES THAT UPON PERMANENT SITE STABILIZATION AND COMPLETION OF THE CONTRACTOR SHALL APPLY TO THE DISTRICT FOR FINAL COMPLIANCE INSPECTION TO CHECK THAT ALL THE PROVISIONS OF THE CERTIFIED SOIL EROSION AND SEDIMENT CONTROL PLAN HAVE BEEN COMPLIED WITH FOR PERMANENT MEASURES.
- 17. ANY CONVEYANCE OF THIS PROJECT, OR PORTION THEREOF, PRIOR TO ITS COMPLETION WILL TRANSFER FULL RESPONSIBILITY FOR COMPLIANCE WITH THE CERTIFIED PLAN TO ANY SUBSEQUENT OWNERS. THE DISTRICT MUST BE NOTIFIED IN WRITING OF ANY CHANGE IN OWNERSHIP.
- 18. A CRUSHED STONE, TIRE CLEANING PAD WILL BE INSTALLED WHEREVER A CONSTRUCTION ACCESS EXISTS. THE STABILIZED PAD WILL BE INSTALLED ACCORDING TO THE STANDARD FOR STABILIZED CONSTRUCTION ACCESS. THE PAD MUST BE 100 FEET IN LENGTH AND THE STONE MUST BE 1.5 - 4 INCHES IN 5IZE, PLACED 12" THICK AND THE FULL WIDTH OF THE ENTRANCE. THE PAD SHALL BE UNDERLAIN WITH A SUITABLE SYNTHETIC FILTER FABRIC AND MAINTAINED. IF A CONSTRUCTION ACCESS IS TO BE USED AS AN EXIT ONTO A MAJOR HIGHWAY, A THIRTY (30) PAVED TRANSITION AREA SHALL BE INSTALLED. CONSTRUCTION ACCESS ONTO INDIVIDUAL LOTS MUST BE STABILIZED WITH 2.5" CRUSHED STONE OR SUBBASE.
- 19. PAVED ROADWAYS MUST BE KEPT CLEAN AT ALL TIMES.
- 20. ALL CATCH BASIN INLETS WILL BE PROTECTED ACCORDING TO THE CERTIFIED PLAN.
- 21. ALL STORM DRAINAGE OUTLETS SHALL BE STABILIZED AS REQUIRED BEFORE THE DISCHARGE POINT BECOMES OPERATION.
- 22. NATURAL VEGETATION AND SPECIES SHALL BE RETAINED WHERE SPECIFIED ON THE LANDSCAPE PLAN.
- 23. ADJOINING PROPERTIES SHALL BE PROTECTED FROM EXCAVATION AND FILLING OPERATIONS ON THE CONSTRUCTION SITE.
- 24. THE DEVELOPER SHALL BE RESPONSIBLE FOR ANY EROSION OR SEDIMENTATION THAT MAY OCCUR BELOW STORMWATER OUTFALLS OR OFFSITE AS A RESULT OF CONSTRUCTION OF THE PROJECT.
- STOCKPILE MUST BE STABILIZED ACCORDING TO THE STANDARD FOR TEMPORARY VEGETATIVE COVER. STABILIZE TOPSOIL PILE WITH STRAW MULCH FOR PROTECTION IF THE SEASON DOES NOT PERMIT THE APPLICATION AND ESTABLISHMENT OF TEMPORARY SEEDING.

25. IMMEDIATELY AFTER THE COMPLETION OF STRIPPING AND STOCKPILING OF TOPSOIL. THE

- 26. ALL SOIL STOCKPILES ARE NOT TO BE LOCATED WITHIN FIFTY (50) FEET OF A FLOODPLAIN, SLOPE, ROADWAY OR DRAINAGE FACILITY AND THE BASE MUST BE PROTECTED WITH SEDIMENT BARRIER.
- 27. MAXIMUM SIDE SLOPES OF ALL EXPOSED SURFACES SHALL NOT BE CONSTRUCTED STEEPER THAN 3:1 UNLESS OTHERWISE APPROVED BY THE SOIL CONSERVATION DISTRICT.
- 28. ALL CRITICAL AREAS SUBJECT TO SOIL EROSION WILL RECEIVE A TEMPORARY SEEDING IN COMBINATION WITH STRAW MULCH AT A RATE OF 92 POUNDS PER 1000 SQUARE FEET ACCORDING TO THE NEW JERSEY STANDARDS IMMEDIATELY FOLLOWING ROUGH GRADING.
- 29. TEMPORARY AND PERMANENT SEEDING MEASURES MUST BE APPLIED ACCORDING TO THE NEW JERSEY STANDARDS, AND MULCHED WITH SALT HAY OR EQUIVALENT AND ANCHORED IN ACCORDANCE WITH THE NEW JERSEY STANDARDS (I.E. PEG AND TWINE, MULCH NETTING OR LIQUID MULCH BINDER)
- 30. MAXIMUM SIDE SLOPES OF ALL EXPOSED SURFACES SHALL NOT BE CONSTRUCTED STEEPER THAN 3:1 UNLESS OTHERWISE APPROVED BY THE SOIL CONSERVATION DISTRICT.
- 31. ANY DISTURBED AREA THAT IS TO BE LEFT EXPOSED FOR MORE THAN THIRTY (30) DAYS AND NOT SUBJECT TO CONSTRUCTION TRAFFIC SHALL IMMEDIATELY RECEIVE A TEMPORARY SEEDING AND FERTILIZATION IN ACCORDANCE WITH THE NEW JERSEY STANDARDS AND THEIR RATES SHOULD BE IN ACCORDANCE WITH THE TEMPORARY SEEDING SPECIFICATION. IF THE SEASON PROHIBITS TEMPORARY SEEDING, THE DISTURBED AREAS WILL BE MULCHED WITH SALT HAY OR THE EQUIVALENT AND ANCHORED IN ACCORDANCE WITH THE NEW JERSEY STANDARDS (I.E. PEG AND TWINE, MULCH NETTING OR LIQUID MULCH BINDER).
- 32. MULCHING IS REQUIRED ON ALL SEEDED AREAS TO ENSURE AGAINST SOIL EROSION BEFORE GRASS IS ESTABLISHED TO PROMOTE EARLIER VEGETATION COVER.
- 33. IT SHALL BE THE RESPONSIBILITY OF THE DEVELOPER TO PROVIDE CONFIRMATION OF LIME. FERTILIZER AND SEED APPLICATION AND RATES OF APPLICATION AT THE REQUEST OF THE SOIL CONSERVATION DISTRICT
- 34. ALL VEGETATIVE MATERIAL SHALL BE SELECTED IN ACCORDANCE WITH AMERICAN STANDARDS FOR NURSERY STOCK OF THE AMERICAN ASSOCIATION OF THE NURSERYMEN AND IN ACCORDANCE WITH THE NEW JERSEY STANDARDS.
- 35. ALL DEWATERING OPERATIONS MUST DISCHARGE DIRECTLY INTO A SEDIMENT FILTER AREA. THE SEDIMENT FILTER SHOULD BE COMPOSED OF A SUITABLE FILTER FABRIC. (SEE DETAIL) THE SEDIMENT FILTER MUST BE CAPABLE OF FILTERING THE SEDIMENT AND BE PLACED SÓ AS NOT TO CAUSE EROSION OF THE DOWNSTREAM AREA. FIELD PLACEMENT AND USE OF THE STRUCTURE MUST BE APPROVED BY THE DISTRICT PRIOR TO COMMENCEMENT OF DEWATERING ACTIVITIES. THE WATER QUALITY BASIN MUST BE DEWATERED TO NORMAL POOL WITHIN 10 DAYS OF THE DESIGN STORM.
- 36. DUST IS TO BE CONTROLLED BY AN APPROVED METHOD ACCORDING TO THE NEW JERSEY STANDARDS AND INCLUDE WATERING WITH A SOLUTION OF CALCIUM CHLORIDE AND WATER.
- 37. METHODS FOR THE MANAGEMENT OF HIGH ACID PRODUCING SOILS SHALL BE IN ACCORDANCE WITH THE NEW JERSEY STANDARDS. HIGH ACID PRODUCING SOILS ARE THOSE FOUND TO CONTAIN IRON SULFIDES OR HAVE A PH OF 4 OR LESS.

#### WORK HOURS AND NOISE CONTROL

- 1. CONSTRUCTION HOURS
- A. MONDAY THRU FRIDAY: 7:00AM-6:00PM
- B. SATURDAY: 8:00AM-4:30PM
- C. SUNDAY: NO WORK TO BE PERFORMED.
- D. THE HOURS STATED SHALL BE ADHERED TO UNLESS DUE TO WEATHER AND OR SCHEDULE CHANGES. THE CITY OF ABSECON SHALL BE NOTIFIED OF ALL TIME CHANGES.
- 2. NOISE CONTROL EQUIPMENT TO BE UTILIZED SHALL BE STANDARD EARTH MOVING EQUIPMENT, CRANES, MIXERS, ETC. WHICH MEET STANDARDS ESTABLISHED BY STATE AND FEDERAL LAWS REGARDING THE AMOUNT OF NOISE PRODUCED.

#### **DETAILED CONSTRUCTION SEQUENCE**

- 1. INSTALL SILT FENCE AND SOIL EROSION MEASURES.
- 2. STRIP TOPSOIL FROM EXISTING GRASS AREAS.
- 3. STRIP TOPSOIL AND STOCKPILE WHERE INDICATED ON PLAN IN ACCORDANCE WITH STOCKPILE DETAIL.
- 4. CONSTRUCTION OF BASIN.
- 5. BEGIN ROADWAY AND SITE ROUGH GRADING.
- 6. BEGIN BUILDING CONSTRUCTION (INCLUDING CURBS, AND FINAL PAVING).
- 7. PRIOR TO FINAL GRADING, TOPSOILING AND STABILIZATION OF GRASSED SWALES, GRASSED AREAS AND OTHER PERVIOUS AREAS, DECOMPACTION SHALL TAKE PLACE AND BE APPROVED BY THE GCSCD INSPECTOR.
- 8. INSTALL LANDSCAPING AS INDICATED.
- 9. CONSTRUCTED BASIN WILL BE CLEANED OF ALL SEDIMENT AND STABILIZED.
- 10. UPON FINAL APPROVAL OF THE SOMERSET-UNION COUNTY SOIL CONSERVATION DISTRICT, ALL TEMPORARY MEASURES SHALL BE REMOVED.

#### TEMPORARY AND PERMANENT STABILIZATION

- STABILIZATION COVER SHALL BE ACCOMPLISHED BY THE FOLLOWING METHODS AND MATERIALS:
- A. SITE PREPARATION
- 1) PREPARE SUBGRADE AS NEEDED AND FEASIBLE TO ALLOW USE OF CONVENTIONAL EQUIPMENT FOR TOPSOILING, SEEDBED PREPARATION, SEEDING, MULCH APPLICATION, AND MULCH ANCHORING.
- 2) INSTALL NEEDED SOIL EROSION CONTROL PRACTICES OR MEASURES SUCH AS DIVERSIONS, GRADE STABILIZATION STRUCTURES, CHANNEL STABILIZATION MEASURES, SEDIMENT BASINS, AND WATERWAYS.
- 3) THE SUBGRADE SHALL BE FREE OF EXCESSIVE COMPACTION TO A DEPTH OF 6 INCHES TO ENHANCE THE ESTABLISHMENT OF VEGETATIVE COVER. IF TESTING INDICATES EXCESSIVE SUBGRADE COMPACTION, THE SUBGRADE SHALL BE DE-COMPACTED TO A DEPTH OF 6 INCHES PRIOR TO THE APPLICATION OF TOPSOIL THE SUBGRADE SHALL BE SCARIFIED TO A DEPTH OF 6" TO 12" WHERE THERE HAS BEEN EXCESSIVE SOIL COMPACTION. THIS PRACTICE IS PERMISSIBLE ONLY IN AREAS WHERE THERE IS NO DANGER TO UNDERGROUND UTILITIES (CABLES, IRRIGATION SYSTEMS, ETC.).
- 4) THE SUBGRADE SHALL BE TESTED TO DETERMINE WHETHER COMPACTION EXCEEDS THE MAXIMUM THRESHOLDS INDICATED FOR THE SIMPLIFIED TESTING METHODS. THE TEST SHALL BE PREFORMED AT ONE-HALF ACRE INTERVALS FOR SITES ONE ACRE OR MORE. FOR SITES LESS THAN ONE ACRE. AT LEAST TWO TESTS ARE REQUIRED REGARDLESS OF THE SIZE. CONTIGUOUS AREAS OF 500 SQUARE FEET OR LESS ARE EXEMPT FROM TESTING OR REMEDIATION. COMPACTION TESTING METHODS SHALL INCLUDE (1) PROBING WIRE TEST. (2) HAND-HELD PENETROMETER TEST. (3) TUBE BULK DENSITY TEST, OR (4) NUCLEAR DENSITY TEST. THE MAXIMUM THRESHOLD FOR THE PROBING WIRE TEST IS DETERMINED IF A 15 GAGE WIRE BENDS WHEN INSERTED INTO THE SUBGRADE TO A DEPTH OF 6 INCHES OR FOR THE PENETROMETER TEST IF THE PRESSURE AT A DEPTH OF 6 INCHES IS 300 PSI OR MORE. IF COMPACTION EXCEEDS THE MAXIMUM THRESHOLD, THE CONTRACTOR SHALL HAVE THE OPTION TO PERFORM EITHER (1) COMPACTION MITIGATION OVER THE ENTIRE MITIGATION AREA, OR (2) PERFORM ADDITIONAL MORE DETAILED TESTING TO ESTABLISH THE LIMITS OF EXCESSIVE COMPACTION WHEREUPON ONLY THE EXCESSIVELY COMPACTED AREAS WOULD REQUIRE COMPACTION MITIGATION. ADDITIONAL DETAILED TESTING SHALL BE PERFORMED BY A TRAINED, LICENSED PROFESSIONAL.
- B. STRIPPING AND STOCKPILING
- 1) FIELD EXPLORATION SHOULD BE MADE TO DETERMINE WHETHER QUANTITY AND/OR QUALITY OF SURFACE SOIL JUSTIFIES STRIPPING.
- 2) STRIPPING SHOULD BE CONFINED TO THE IMMEDIATE CONSTRUCTION AREA.
- 3) WHERE FEASIBLE, LIME MAY BE APPLIED BEFORE STRIPPING AT A RATE DETERMINED BY SOIL TEST TO BRING THE SOIL PH TO APPROXIMATELY 6.5. IN LIEU OF SOIL TEST, SEE LINE RATE GUIDE IN SEEDBED PREPARATION.
- 4) A 4 TO 6 INCH STRIPPING DEPTH IS COMMON, BUT MAY VARY DEPENDING ON THE PARTICULAR SOIL.
- 5) STOCKPILES OF TOPSOIL SHOULD BE SITUATED SO AS NOT TO OBSTRUCT NATURAL DRAINAGE OR CAUSE OFF-SITE ENVIRONMENTAL DAMAGE.
- 6) STOCKPILES OF TOPSOIL SHOULD BE VEGETATED IN ACCORDANCE WITH STANDARDS FOR PERMANENT OR TEMPORARY STABILIZATION. WEEDS SHOULD NOT BE ALLOWED TO GROW ON STOCKPILES.
- C. TOPSOILING THE CONTRACTOR SHALL PREPARE AREAS TO BE STABILIZED WITH PERMANENT VEGETATIVE COVER BY APPLYING TOPSOIL TO A UNIFORM DEPTH OF 6 INCHED. TOPSOIL SHOULD BE FRIABLE, LOAMY, FREE OF DEBRIS, OBJECTIONABLE WEEDS AND STONES, AND CONTAIN NO TOXIC SUBSTANCE OR ADVERSE CHEMICAL OR PHYSICAL CONDITION THAT MAY BE HARMFUL TO PLANT GROWTH. SOLUBLE SALTS SHOULD NOT BE EXCESSIVE (CONDUCTIVITY LESS THAN 0.5 MILLIMHOS PER CENTIMETER. MORE THAN 0.5 MILLIMHOS MAY DESICATE SEEDLINGS AND ADVERSELY IMPACT GROWTH TOPSOIL HAULED IN FROM OFFSITE SHOULD HAVE A MINIMUM ORGANIC MATTER CONTENT OF 2.75 PERCENT. ORGANIC MATTER CONTENT MAY BE RAISED BY ADDITIVES.
- TOPSOIL SUBSTITUTES MAY BE UTILIZED ON SITES WITH INSUFFICIENT TOPSOIL FOR ESTABLISHING PERMANENT VEGETATION. TOPSOIL SUBSTITUTE IS A SOIL MATERIAL WHICH MAY HAVE BEEN AMENDED WITH SAND, SILT, CLAY, ORGANIC MATTER, FERTILIZER OR LIME AND HAS THE APPEARANCE OF TOPSOIL. ALL TOPSOIL SUBSTITUTE MATERIALS SHALL MEET THE REQUIREMENTS OF TOPSOIL NOTED ABOVE. SOIL TESTS SHALL BE PERFORMED TO DETERMINE THE COMPONENTS OF SAND, SILT, CLAY, ORGANIC MATTER, SOLUBLE SALTS AND PH LEVEL.
- D. SEEDBED PREPARATION APPLY LIMESTONE AND FERTILIZER ACCORDING TO SOIL TESTS SUCH AS THOSE OFFERED BY RUTGERS UNIVERSITY SOIL TESTING LABORATORY. SOIL SAMPLE MAILERS ARE AVAILABLE FROM THE LOCAL COOPERATIVE EXTENSION SERVICE OFFICE. IF SOIL TESTING IS NOT FEASIBLE ON SMALL OR VARIABLE SITES, OR WHERE TIMING IS CRITICAL. THE CONTRACTOR MAY APPLY PULVERIZED DOLOMITIC LIMESTONE AT THE RATE OF 90 POUNDS PER 1000 SQUARE FEET. APPLY 10-20-10 FERTILIZER OR FOUIVALENT AT THE RATE OF 11 POUNDS PER 1000 SQUARE FEFT. IN ADDITION. 300 POUNDS 38-0-0 PER ACRE OR EQUIVALENT OF SLOW RELEASE NITROGEN MAY BE USED IN LIEU OF TOPDRESSING. APPLY LIMESTONE (EQUIVALENT TO 50 PERCENT CALCIUM PLUS MAGNESIUM OXIDES) AS FOLLOWS:

### TONS / ACRE CLAY, CLAY LOAM & HIGH ORGANIC SOIL SANDY LOAM, LOAM & SILT LOAM

LOAMY SAND, SAND

- THE LIME AND FERTILIZER SHALL THEN BE "WORKED" INTO THE SOIL TO A DEPTH OF 4" WITH A DISC. SPRINGTOOTH HARROW OR OTHER SUITABLE FOUIPMENT.
- TEMPORARY VEGETATION SEEDING ESTABLISH TEMPORARY VEGETATIVE COVER ON SOILS EXPOSED FOR PERIODS OF TWO TO SIX MONTHS WHICH ARE NOT BEING GRADED. NOT UNDER ACTIVE CONSTRUCTION OR NOT SCHEDULED FOR PERMANENT SEEDING WITHIN 60 DAYS. SEEDING SHALL CONSIST OF PERENNIAL RYEGRASS APPLIED AT THE RATE OF 1 POUND PER 1000 SQUARE FEET DURING COOL SEASON OR WEEPING LOVEGRASS AT 5 LBS. PER ACRE DURING WARM SEASON PLANTING.
- PERMANENT VEGETATION SEEDING IMMEDIATELY FOLLOWING THE COMPLETION OF CONSTRUCTION ACTIVITIES AT THE SITE. THE CONTRACTOR SHALL STABILIZE WITH PERMANENT VEGETATIVE COVER. ALL EXPOSED AND DISTURBED SOILS.

LBS/1000 S.F. 3.00

CHEWING FESCUE 1.00 1.00 STRONG CREEPING RED FESCUE 0.25 PERENNIAL RYEGRASS

#11 MIXTURE (SWALE)	LBS/ACRE	<u>LBS/1000 S.F</u>
KENTUCKY BLUEGRASS	45	1.00
TURF-TYPE TALL FESCUE	22	0.50

IF HYDROSEEDING IS USED ALL SEEDING RATES SHALL BE INCREASED BY 25%. IF SODDING IS USED SEE SOD SPECIFICATIONS.

- G. SEEDING DATES SEEDING DATES FOR VEGETATION SHALL OCCUR BETWEEN MARCH AND APRIL 30 (OPTIMAL PLANTING PERIOD) OR BETWEEN AUGUST 15 AND NOVEMBER 15. IF SEED IS NOT PLANTED WITHIN THESE DATES, THE CONTRACTOR SHALL STABILIZE WITH MULCH AS SPECIFIED ABOVE.
- E. MULCHING THE CONTRACTOR SHALL MULCH ALL NEWLY SEEDED AREAS WITH UNROTTED SMALL GRAIN STRAW OR HAY FREE OF SEEDS AT THE RATE OF 70 TO 90 POUNDS PER 1,000 SQUARE FEET. IT SHALL BE ANCHORED THROUGH THE USE OF THE PEG AND TWINE METHOD. THE PEG AND TWINE METHOD OF MULCH ANCHORING SHALL CONSIST OF DRIVING 8-10 INCH WOODEN PEGS TO WITHIN 2-3 INCHES OF THE SOIL SURFACE EVERY 4 FEET IN ALL DIRECTIONS. STAKES MAY BE DRIVEN BEFORE OR AFTER APPLYING MULCH. SECURE MULCH TO SOIL SURFACE BY STRETCHING TWINE BETWEEN PEGS IN A CRISS-CROSS AND A SQUARE PATTERN. SECURE TWINE AROUND EACH PEG WITH TWO OR MORE ROUND TURNS.
- F. SODDING
- 1) CULTIVATED SOD IS PREFERRED OVER NATIVE SOD. SPECIFY "CERTIFIED SOD". OR OTHER HIGH QUALITY CULTIVATED SOD. SOD SHOULD BE FREE OF WEEDS AND UNDESIRABLE COARSE WEEDY GRASSES. SOD SHOULD BE OF UNIFORM THICKNESS, APPROXIMATELY 5/8 INCH. PLUS OR MINUS 1/4 INCH. AT TIME OF CUTTING. (EXCLUDES TOP GROWTH). SOD SHOULD BE VIGOROUS AND DENSE AND BE ABLE TO RETAIN ITS OWN SHAPE AND WEIGHT WHEN SUSPENDED VERTICALLY WITH A FIRM GRASP FROM THE UPPER 10 PERCENT OF THE STRIP. BROKEN PADS OR TORN OR UNEVEN ENDS WILL NOT BE ACCEPTED. FOR DROUGHTY SITES. A SOD OF KENTUCKY 31 TALL FESCUE AND BLUEGRASS IS PREFERRED OVER A STRAIGHT BLUEGRASS SOD. ONLY MOIST. FRESH. UNHEATED SOD SHOULD BE USED. SOD SHOULD BE HARVESTED, DELIVERED AND INSTALLED WITHIN A PERIOD OF 36 HOURS.
- 2) REMOVE FROM THE SURFACE ALL OBJECTS THAT WOULD PREVENT GOOD SOD TO SOIL CONTACT AND REMOVE ALL OTHER DEBRIS SUCH AS WIRE, CABLE, TREE ROOTS, PIECES OF CONCRETE, CLODS, LUMPS OR OTHER UNSUITABLE MATERIAL.
- 3) INSPECT SITE JUST BEFORE SEEDING. IF TRAFFIC HAS LEFT THE SOIL COMPACTED THE AREA MUST BE RETILLED AND FIRMED AS ABOVE.
- 4) SOD PLACEMENT:
- A) SOD STRIPS SHOULD BE LAID ON THE CONTOUR, NEVER UP AND DOWN THE SLOPE, STARTING AT THE BOTTOM OF THE SLOPE AND WORKING UP. ON STEEP SLOPES, THE USE OF LADDERS WILL FACILITATE THE WORK AND PREVENT DAMAGE TO THE SOD. DURING PERIODS OF HIGH TEMPERATURE, LIGHTLY IRRIGATE THE SOIL IMMEDIATELY PRIOR TO LAYING THE SOD.
- B) PLACE SOD STRIPS WITH SNUG, EVEN JOINTS THAT ARE STAGGERED. OPEN SPACES INVITE EROSION.
- C) ROLL OR TAMP SOD IMMEDIATELY FOLLOWING PLACEMENT TO INSURE SOLID CONTACT OF ROOT MAT AND SOIL SURFACE, DO NOT OVERLAP SOD, ALL JOINTS SHOULD BE BUTTED TIGHTLY IN ORDER TO PREVENT VOIDS WHICH WOULD CAUSE DRYING OF THE ROOTS.
- D) ON SLOPES GREATER THAN 3:1, SECURE SOD TO SURFACE SOIL WITH WOOD PEGS, WIRE STAPLES, OR SPLIT SHINGLES (8" TO 10" LONG BY 3/4" WIDE).
- SURFACE WATER CANNOT ALWAYS BE DIVERTED FROM FLOWING OVER THE FACE OF THE SLOPE, BUT A CAPPING STRIP OF HEAVY JUTE OR PLASTIC NETTING. PROPERLY SECURED. ALONG THE CROWN OF THE SLOPE AND EDGES WILL PROVIDE EXTRA PROTECTION AGAINST LIFTING AND UNDERCUTTING OF SOD. THE SAME TECHNIQUE CAN BE USED TO ANCHOR SOD IN WATER-CARRYING CHANNELS AND OTHER CRITICAL AREAS. WIRE STAPLES MUST BE USED TO ANCHOR NETTING IN CHANNEL WORK.
- E) IMMEDIATELY FOLLOWING INSTALLATION, SOD SHOULD BE WATERED UNTIL MOISTURE PENETRATES THE SOIL LAYER BENEATH SOD TO A DEPTH OF 4 INCHES. MAINTAIN OPTIMUM MOISTURE FOR AT LEAST TWO WEEKS.
- F) TOPDRESSING IF SLOW RELEASE NITROGEN (300 POUNDS 38-0-0 PER ACRE OR EQUIVALENT) IS USED IN ADDITION TO SUGGESTED FERTILIZER. THEN A FOLLOW-UP OF TOPDRESSING IS NOT MANDATORY.
- FALL INSTALLATION OF SOD WILL REQUIRE AN APPLICATION OF FERTILIZER SUCH AS 10-20-10 OR EQUIVALENT AT 400 POUNDS PER ACRE OR 10 POUNDS PER 1000 SQUARE FEET BETWEEN SEPTEMBER 1 AND OCTOBER 15.

### MANAGEMENT OF HIGH ACID-PRODUCING SOILS

HIGH ACID-PRODUCING SOILS ARE SOILS WITH A PH OF 4.0 OR LESS OR CONTAIN IRON SULFIDE. HIGH ACID-PRODUCING SOILS MAY BE PRESENT IN UNDISTURBED SOILS AT VARYING DEPTHS, INCLUDING NEAR THE SOIL SURFACE TO EXCAVATIONS OR DEEP DISTURBANCES. ITS PRESENCE ON A SITE MAY BE SIGNIFICANT OR LIMITED IN THE SOIL PROFILE. HIGH ACID-PRODUCING SOILS ARE COMMONLY BLACK, DARK BROWN, GRAY OR GREENISH WITH SILVERY PYRITE OR MARCASITE NUGGETS OR FLAKES. ALTERNATIVELY, SANDY SOILS OR REDDISH, YELLOWISH OR LIGHT TO MEDIUM BROWN SOIL MATERIALS ARE USUALLY FREE OF HIGH ACID-PRODUCING DEPOSITS.

TO PREVENT OR LIMIT EXPOSURE AREA, TIME, AND SPREADING BY EQUIPMENT OR RAINFALL ON- AND OFF-SITE AND TO MINIMIZE EROSION, SEDIMENTATION AND ACID LEACHATE-RELATED DAMAGES. HIGH ACID-PRODUCING SOIL MAY BE EXPOSED DURING EXCAVATION AND LAND GRADING ACTIVITIES, OR MAY BE INTRODUCED IN DREDGED SEDIMENT, SOILS AND SEDIMENT CONTAINING IRON SULFIDE, CHARACTERIZED BY PYRITE OR MARCASITE NUGGETS OR GREENSANDS, ARE CHEMICALLY OXIDIZED WHEN EXPOSED TO AIR, PRODUCING SULFURIC ACID AND RESULT IN SOIL PH LEVELS FALLING TO PH 4.0 AND LOWER. MOST VEGETATION IS INCAPABLE OF GROWTH AT THIS PH LEVEL. ADJACENT LAND AND RECEIVING WATERS WILL BE NEGATIVELY IMPACTED BY THE ACID LEACHATE. CALCIUM—CONTAINING MATERIALS SUCH AS SIDEWALKS, CULVERTS AND OTHER STRUCTURES AND SOME METALLIC MATERIALS ARE ALSO SUSCEPTIBLE TO DEGRADATION. AGRICULTURAL LIMESTONE MATERIALS APPLIED AT RATES OF 8 TONS PER ACRE HAVE RESULTED IN ONLY A TEMPORARY BUFFERING EFFECT, AND 'LIMING-ONLY" IS THEREFORE NOT CONSIDERED AN ACCEPTABLE MITIGATION PRACTICE.

METHODS AND MATERIALS OF MANAGING HIGH ACID-PRODUCING SOILS

- 1. LIMIT THE EXCAVATION AREA AND EXPOSURE TIME WHEN HIGH ACID-PRODUCING SOILS ARE ENCOUNTERED.
- 2. TOPSOIL STRIPPED FROM THE SITE SHALL BE STORED SEPARATELY FROM TEMPORARILY STOCKPILED HIGH ACID-PRODUCING SOILS.
- 3. STOCKPILES OF HIGH ACID-PRODUCING SOIL SHOULD BE LOCATED ON LEVEL LAND TO MINIMIZE ITS MOVEMENT, ESPECIALLY WHEN THIS MATERIAL HAS A HIGH CLAY CONTENT.
- . TEMPORARILY STOCKPILED HIGH ACID—PRODUCING SOIL MATERIAL TO BE STORED MORE THAN 48 HOURS SHOULD BE COVERED WITH PROPERLY ANCHORED, HEAVY GRADE SHEETS OF POLYETHYLENE WHERE POSSIBLE. IF NOT POSSIBLE, STOCKPILES SHALL BE COVERED WITH A MINIMUM OF 3 TO 6 INCHES OF WOOD CHIPS TO MINIMIZE EROSION OF THE STOCKPILE. SILT FENCE SHALL BE INSTALLED AT THE TOE OF THE SLOPE TO CONTAIN MOVEMENT OF THE STOCKPILED MATERIAL. TOPSOIL SHALL NOT BE APPLIED TO THE STOCKPILES TO PREVENT TOPSOIL CONTAMINATION WITH HIGH ACID-PRODUCING SOIL.
- 5. HIGH ACID-PRODUCING SOILS WITH A PH OF 4.0 OR LESS OR CONTAINING IRON SULFIDE (INCLUDING BORROW FROM CUTS OR DREDGED SEDIMENT) SHALL BE ULTIMATELY PLACED OR BURIED WITH LIMESTONE APPLIED AT THE RATE OF 10 TONS PER ACRE (OR 450 POUNDS PER 1.000 SQUARE FEET OF SURFACE AREA) AND COVERED WITH A MINIMUM OF 12 INCHES OF SETTLED SOIL WITH A PH OF 5.0 OR MORE EXCEPT AS FOLLOWS:
- A. AREAS WHERE TREES OR SHRUBS ARE TO BE PLANTED SHALL BE COVERED WITH A MINIMUM OF 24 INCHES OF SOIL WITH A PH OR 5 OR MORE.
- B. DISPOSAL AREAS SHALL NOT BE LOCATED WITHIN 24 INCHES OF ANY SURFACE OF A SLOPE OR BANK, SUCH AS BERMS, STREAM BANKS, DITCHES, AND OTHERS, TO PREVENT POTENTIAL LATERAL LEACHING DAMAGES.
- AT THE END OF EACH DAY TO PREVENT SPREADING OF HIGH ACID-PRODUCING SOIL MATERIALS TO OTHER PARTS OF THE SITE, INTO STREAMS OR STORMWATER CONVEYANCES. AND TO PROTECT MACHINERY FROM ACCELERATED RUSTING. 7. NON-VEGETATIVE EROSION CONTROL PRACTICES (STONE TRACKING PADS, STRATEGICALLY

PLACED LIMESTONE CHECK DAM, SEDIMENT BARRIER, WOOD CHIPS) SHOULD BE INSTALLED

TO LIMIT THE MOVEMENT OF HIGH ACID-PRODUCING SOILS FROM, AROUND, OR OFF THE

6. EQUIPMENT USED FOR MOVEMENT OF HIGH ACID-PRODUCING SOILS SHOULD BE CLEANED

8. FOLLOWING BURIAL OR REMOVAL OF HIGH ACID-PRODUCING SOIL. TOPSOILING AND SEEDING

OF THE SITE (SEE TEMPORARY VEGETATIVE COVER FOR SOIL STABILIZATION, PERMANENT VEGETATIVE COVER FOR SOIL STABILIZATION. AND TOPSOILING). MONITORING MUST CONTINUE FOR A MINIMUM OF 6 MONTHS TO ENSURE THERE IS ADEQUATE STABILIZATION AND THAT NO HIGH ACID-PRODUCING SOIL PROBLEMS EMERGE. IF PROBLEMS STILL EXIST, THE AFFECTED AREA MUST BE TREATED AS INDICATED ABOVE TO CORRECT THE PROBLEM.

#### **DUST CONTROL:**

DUST CONTROL SHALL BE ACCOMPLISHED BY THE METHODS DESCRIBED BELOW.

MATERIAL	WATER DILUTION	TYPE OF NOZZLE	APPLY GALLONS/AC		
ANIONIC ASPHALT EMULSION	7:1	COARSE SPRAY	1200		
LATEX EMULSION	12,5:1	FINE SPRAY	235		
RESIN IN WATER	4:1	FINE SPRAY	300		
POLYACRYLAMIDE (PAM) — SPRAY ON POLYACRYLAMIDE (PAM) — DRY SPREAD	MAY ALSO BE USED TO FLOCCULATE AN	PPLY ACCORDING TO MANUFACTURER'S INSTRUCTIONS.  AY ALSO BE USED AS AN ADDITIVE TO SEDIMENT BASINS  D FLOCCULATE AND PRECIPITATE SUSPENDED COLLOIDS.  EE SEDIMENT BASIN STANDARD, P. 26-1			
ACIDULATED SOY BEAN SOAP STICK	NONE	COARSE SPRAY	1200		

EMERGENCY MEASURE WHICH SHOULD BE USED BEFORE SOIL BLOWING STARTS. BEGIN PLOWING ON WINDWARD SIDE OF SITE. CHISEL-TYPE PLOWS PLACED ABOUT 12 INCHES APART, AND SPRING TOOTHED HARROWS ARE EXAMPLES OF EQUIPMENT WHICH MAY PRODUCE THE DESIRED.

TILLAGE: TO ROUGHEN SURFACE AND BRING CLODS TO THE SURFACE. THIS IS A TEMPORARY

SPRINKLING: SITE IS SPRINKLED UNTIL THE SURFACE IS WET.

BARRIERS: SOLID BOARD FENCES, SNOW FENCES, BURLAP FENCES, CRATE WALLS, BALES OF HAY AND SIMILAR MATERIAL CAN BE USED TO CONTROL AIR CURRENTS AND SOIL BLOWING.

CALCIUM CHLORIDE: SHALL BE IN THE FORM OF LOOSE, DRY GRANULES OR FLAKES FINE ENOUGH TO FEED THROUGH COMMONLY USED SPREADERS AT A RATE THAT WILL KEEP SURFACE MOIST BUT NOT CAUSE POLLUTION OR PLANT DAMAGE. IF USED ON STEEPER SLOPES, THEN USE OTHER PRACTICES TO PREVENT WASHING INTO STREAMS, OR ACCUMULATION AROUND PLANTS.

STONE: COVER SURFACE WITH CRUSHED STONE OR COARSE GRAVEL.

SITE.

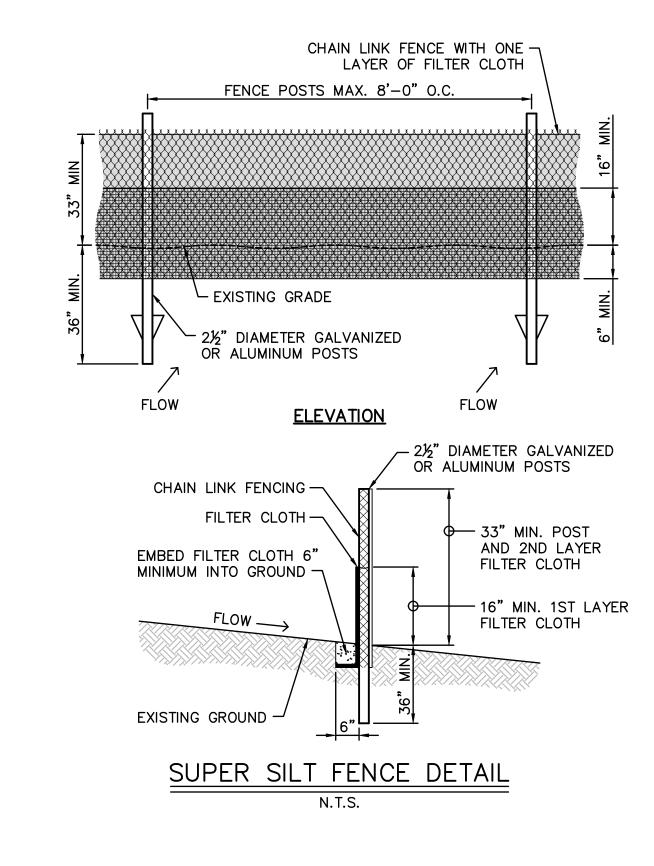

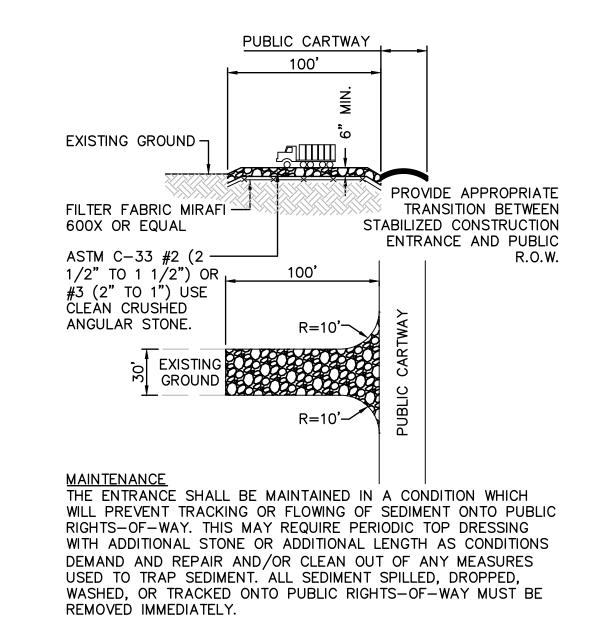

- 1. PREPARE SOIL BEFORE INSTALLING BLANKETS, INCLUDING ANY NECESSARY APPLICATION OF LIME, FERTILIZER, AND SEED. NOTE: WHEN USING CELL-O-SEED DO NOT SEED PREPARED AREA. CELL-O-SEED MUST BE INSTALLED WITH PAPER SIDE DOWN.
- 2. BEGIN AT THE TOP OF THE SLOPE BY ANCHORING THE BLANKET IN A 6" DEEP X 6" WIDE TRENCH WITH APPROXIMATELY 12" OF BLANKET EXTENDED BEYOND THE UP-SLOPE PORTION OF THE TRENCH. ANCHOR THE BLANKET WITH A ROW OF STAPLES/STAKES APPROXIMATELY 12" APART IN THE BOTTOM OF THE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING. APPLY SEED TO COMPACTED SOIL AND FOLD REMAINING 12" PORTION OF BLANKET BACK OVER SEED AND COMPACTED SOIL. SECURE BLANKET OVER COMPACTED SOIL WITH A ROW OF STAPLES/STAKES SPACED APPROXIMATELY 12" APART ACROSS THE WIDTH OF THE BLANKET.
- 3. ROLL THE BLANKETS (A.) DOWN OR (B.) HORIZONTALLY ACROSS THE SLOPE. BLANKETS WILL UNROLL WITH APPROPRIATE SIDE AGAINST THE SOIL SURFACE. ALL BLANKETS MUST BE SECURELY FASTENED TO SOIL SURFACE BY PLACING STAPLES/STAKES IN APPROPRIATE LOCATIONS AS SHOWN IN THE STAPLE PATTERN GUIDE. WHEN USING OPTIONAL DOT SYSTEM, STAPLES/STAKES SHOULD BE PLACED THROUGH EACH OF THE COLORED DOTS CORRESPONDING TO THE APPROPRIATE STAPLE PATTERN.
- 4. THE EDGES OF PARALLEL BLANKETS MUST BE STAPLED WITH APPROXIMATELY 2"-5" OVERLAP DEPENDING ON BLANKET TYPE. TO ENSURE PROPER SEAM ALIGNMENT, PLACE THE EDGE OF THE OVERLAPPING BLANKET (BLANKET BEING INSTALLED ON TOP) EVEN WITH THE COLORED SEAM STITCH ON THE PREVIOUSLY INSTALLED BLANKET.
- 5. CONSECUTIVE BLANKETS SPLICED DOWN THE SLOPE MUST BE PLACED END OVER END (SHINGLE STYLE) WITH AN APPROXIMATE 3" OVERLAP. STAPLE THROUGH OVERLAPPED AREA, APPROXIMATELY 12" APART ACROSS ENTIRE BLANKET WIDTH.

IN LOOSE SOIL CONDITIONS, THE USE OF STAPLE OR STAKE LENGTHS GREATER THAN 6" MAY BE NECESSARY TO PROPERLY SECURE THE BLANKETS.

SLOPE BLANKET INSTALLATION DETAIL

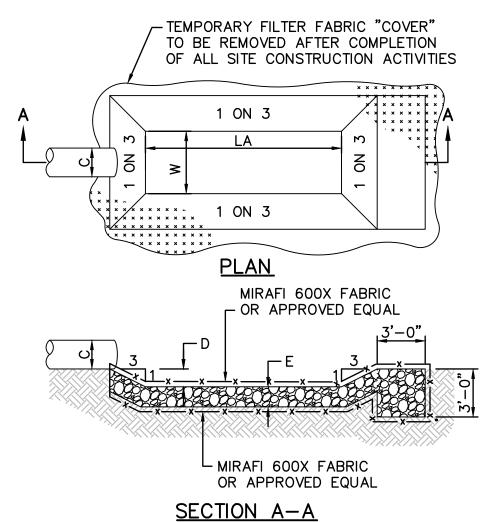

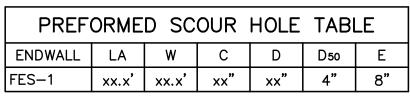

STABILIZED CONSTRUCTION

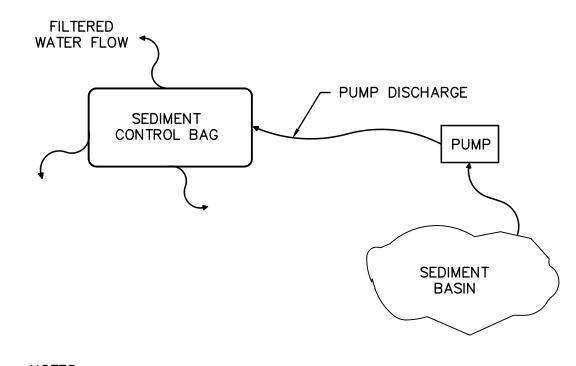

ENTRANCE DETAIL

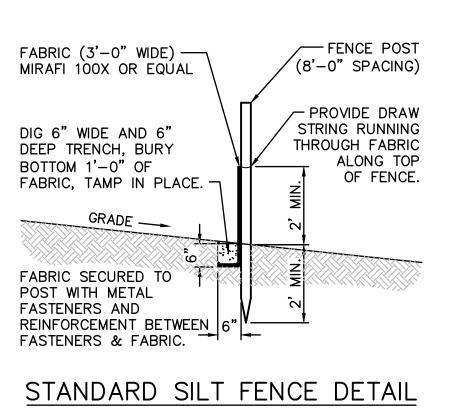

FIFTY PERCENT, BY WEIGHT, OF THE RIP-RAP MIXTURE SHALL BE SMALLER THAN MEDIAN STONE SIZE DESIGNATED AS D50. THE LARGEST STONE SIZE IN THE MIXTURE SHALL BE 1.5 TIMES THE D50 SIZE. 2. A THREE FOOT WIDE BY THREE FOOT DEEP TOE

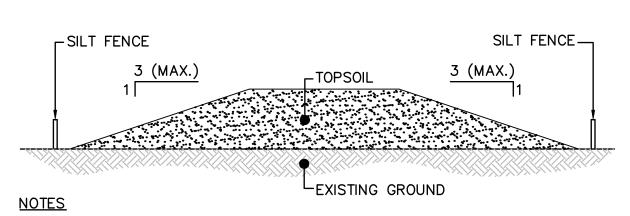

WALL SHALL BE CONSTRUCTED AT THE END OF THE SCOUR HOLE. 3. THE D50 SIZE SHOWN IS THE MINIMUM SIZE CALCULATED.

1. BAG MUST BE LOCATED AWAY FROM RECEIVING WATERS AND/OR CONSTRUCTION ACTIVITIES. 2. BAG MUST BE DISPOSED OF ACCORDING TO MANUFACTURER'S INSTRUCTIONS. BAGS MAY NOT BE REUSED.

> SEDIMENT CONTROL BAG FOR DEWATERING DETAIL

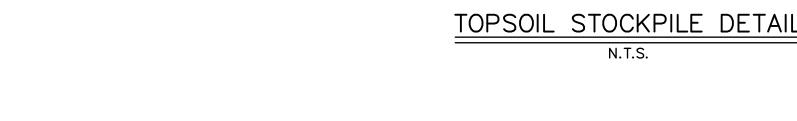

- 1. TOPSOIL STOCKPILE SHALL BE SURROUNDED BY SILT FENCE.
- 2. STOCKPILE SHALL RECEIVE TEMPORARY VEGETATIVE STABILIZATION IN ACCORDANCE WITH THE STANDARDS FOR SOIL EROSION AND SEDIMENT CONTROL IN NEW JERSEY IMMEDIATELY AFTER COMPLETION OF STOCKPILE.
- 3. STOCKPILES ARE NOT TO BE LOCATED WITHIN FIFTY FEET OF A

FLOODPLAIN, SLOPES, ROADWAY, OR DRAINAGE FACILITY.

### LANDSCAPE SPECIFICATIONS

#### **PLANT MATERIAL**

engineer.

**PROTECTION** 

**EXECUTION** 

- 1. All plants shall meet or exceed the minimum requirements as noted in the latest edition of the American standard for nursery stock by American association of nurserymen, ANSI Z60.1. All plant materials installed shall meet the latest specifications of the "American Standards for Nursery Stock."
- 2. Plant sizes shown in planting schedule are the size at time of planting.
- Plant material shall be well-grown and true to form for size and species. Stunted or leggy plant material will be rejected.
- 4. Plant materials that have damaged or crooked leaders, deformed growth habit, abrasions of 10. All proposed trees shall be installed either entirely in or entirely out of planting beds. the bark, sunscald, windburn, disfiguring knots, insect or disease pests shall be rejected. In
- addition, trees having their central leaders headed back will also be rejected. 5. All plants (B&B or container) shall be properly identified by weather-proof labels securely attached thereto before delivery to project site. Labels shall identify plants by name, species 11. All planting beds adjacent to lawn, sod or seeded areas shall be spade edged. and size. Labels shall not be removed until the final inspection by the landscape architect or 12. Maintenance shall begin after each plant has been installed and shall continue until 90 days
- 6. All trees shall be balled and burlapped, unless otherwise noted in the drawings or specification, or approved by the owner's representative.
- Final quantity for each plant type shall be as graphically shown on the plan. This number shall take precedence in case of any discrepancy between quantities shown on the plant list and on the plan. The contractor shall report any discrepancies between the number of plants shown on the plant list and plant labels prior to bidding.
- 8. Any proposed plant substitutions must be reviewed by landscape architect and approved in writing by the owner's representative. No substitutions shall be made without written consent of the architect.
- 9. All specified plant material is subject to inspection and approval by the landscape architect
- 10. All B&B materials (i.e. burlap, twine, etc) shall be all bio-degradable materials.

foot or vehicle traffic or parking of vehicles within drip line.

at both the nursery and jobsite prior to installation

- 11. All plant materials shall be guaranteed for two years following date of final acceptance.
- 1. Existing trees to remain within the development area shall be selectively pruned of any dead or dying limbs. Existing trees located at the edge of wooded areas to be cleared shall be evaluated for preservation or removal based on survivability and safety considerations.
- Trees within existing wooded areas to remain shall not be pruned. Existing trees and other vegetation indicated to remain in place shall be protected against unnecessary cutting, breaking or skinning of roots, skinning or bruising of bark, smothering of roots by stock piling construction materials or excavated material within drip line, excess
- 3. Provide a temporary guard to protect trees and vegetation to be left standing as shown on civil drawings prior to start of construction.
- 4. Every possible safeguard shall be taken to protect building surfaces, equipment and furnishings. The contractor shall be responsible for any damage or injury to person or property which may occur as a result of his negligence in the execution of the work. UTILITIES
- drawings for utility, grading, storm water management, and soil erosion control information that may need to be coordinated with landscape work. This plan is intended for planting purposes. Refer to site / civil drawings for all other site construction information.

Landscape plan shall be used for landscape purposes only. Refer to civil engineering

- 2. The contractor shall review architectural/engineering plans to become familiar with grading and surface utilities.
- 3. The contractor shall ensure that work does not interrupt established or projected drainage
- 4. Contractor shall verify locations of all below grade and above ground utilities and notify owners representative of conflicts.
- 5. The contractor shall verify the existence of underground utilities on the site prior to any excavation. Their exact location shall be verified in the field with the owner or general contractor prior to the commencement of any digging operations. In the event utilities are uncovered, the contractor shall be held responsible for all damage to the utilities and such damage shall not result in any additional expenses to the owner. Any damage of reported lines shall not be the responsibility of the contractor.
- 6. Should location of trees be within 5' of underground utilities, relocate said trees to a minimum of 5' from ball to utilities.
- 1. No plant materials shall be installed until all grading and construction has been completed in
- the immediate area. Contractor shall notify owner's representative of any conflict. 2. All plantings shall be contained within mulched beds. Double-shredded hardwood bark or root mulch should be applied at depth of three inches. Planting beds shall be constructed as shown in the "planting bed edge detail" on this sheet. Mulch must be pulled back at least 2" from any plant stem, twig or trunk.
- 3. A 3-inch deep mulch per specification shall be installed under all trees and shrubs, and in all planting beds, unless otherwise indicated on the plans, or as directed by owner's
- 4. All planting backfill soils shall receive certified weed-free fully composted leaf mold soil amendment at a rate of 33% (1 part compost to 2 parts planting soil). Submit compost certification & product data prior to ordering for approval.
- 5. All disturbed areas not otherwise noted on contract documents shall be topsoil and seeded or mulched as directed by owner's representative.

- 6. Carefully disrupt circling roots from all container-grown plants, except plugs, via tool scarification or by hand.
- 7. One year guarantee shall be provided on all plant materials from date of final acceptance. 8. The contractor shall stakeout plantings for the owner's representative's approval prior to
  - beginning work. All proposed planting locations shall be staked as shown on the plans for field review and approval by the landscape architect prior to installation.
- removed from the site. Planting bed lines are not to be obstructed. All shrubs and ground cover area shall be

planted in continuous prepared bed and top dressed with 3-inch shredded hardwood mulch.

During planting operations, excess waste materials shall be promptly and frequently

Mulch shall have been shredded within the last six months.

- after final acceptance by the architect or owner representative. Maintenance includes: watering, pruning, fertilizing, weeding, mulching, replacement of sick or dead plants, and any other care necessary for the proper growth of the plant material. The contractor must be able to provide continued maintenance if requested by the owner.
- 13. Upon completion of all landscaping, an acceptance meeting of the work shall be held. The contractor shall notify the landscape architect or engineer or owner for scheduling the inspection at least (7) days prior to the anticipated inspection date.
- 14. The contractor is responsible for testing project soils. The contractor is to provide a certified soils report to the owner. The contractor shall verify that the soils on site are acceptable for the proper growth of the proposed plant material. Should the contractor find poor soil conditions, the contractor shall be required to provide soil amendments as necessary. The amendments shall include, but not be limited to, fertilizers, lime and topsoil. Proper planting soils must be verified prior to planting of materials.
- 15. Bulbs planting shall be in accordance with Section 11 of the American Association of Nurserymen Standards.
- 16. All tree stakes and wires will be removed by the applicant after 1 year from the date of installation.
- 17. Trees and shrubs must be planted only when the soil is frost-free and friable.
- 18. Contractor shall partially fill with water a representative number of pits in each area of the project prior to planting to determine if there is adequate percolation. If percolation does not occur, measures must be taken to assure proper drainage before planting.
- Areas designated "topsoil & seed" shall receive minimum 6" of topsoil and specified seed mix. Lawns over 2:1 slope shall be protected with erosion control fabric.
- 2. All unsurfaced areas are to receive six inches of topsoil, seed, mulch, and water until a healthy stand of grass is obtained.
- All disturbed area of the site not planted with shrubs or ground cover shall be fine graded and seeded or sodded.
- 4. All sod shall be obtained from areas having growing conditions familiar to areas to be covered. Areas to be sodded shall be raked of stones and debris. Debris and stones over 1 inch in diameter shall be removed from the site. All damaged sod will be rejected. All sod must be placed with staggered joints, butted with no inequalities in grade. Place all sod in
- See seeding specifications for lawn restoration and new seeding information.
- 6. Unless otherwise noted, all disturbed landscape areas not being planted, shall be seeded with the following seed mix: 33.27% Bullseye turf type tall fescue, 33.15% Cochise IV turf type tall fescue and 33.08% LS 1200 turf type tall fescue. Mix shall include no more than 0.50% inert matter.
- 7. Seeding rate shall be 8 lbs. Per 1,000.00 sq. ft.

rows at right angles to slopes (where applicable).

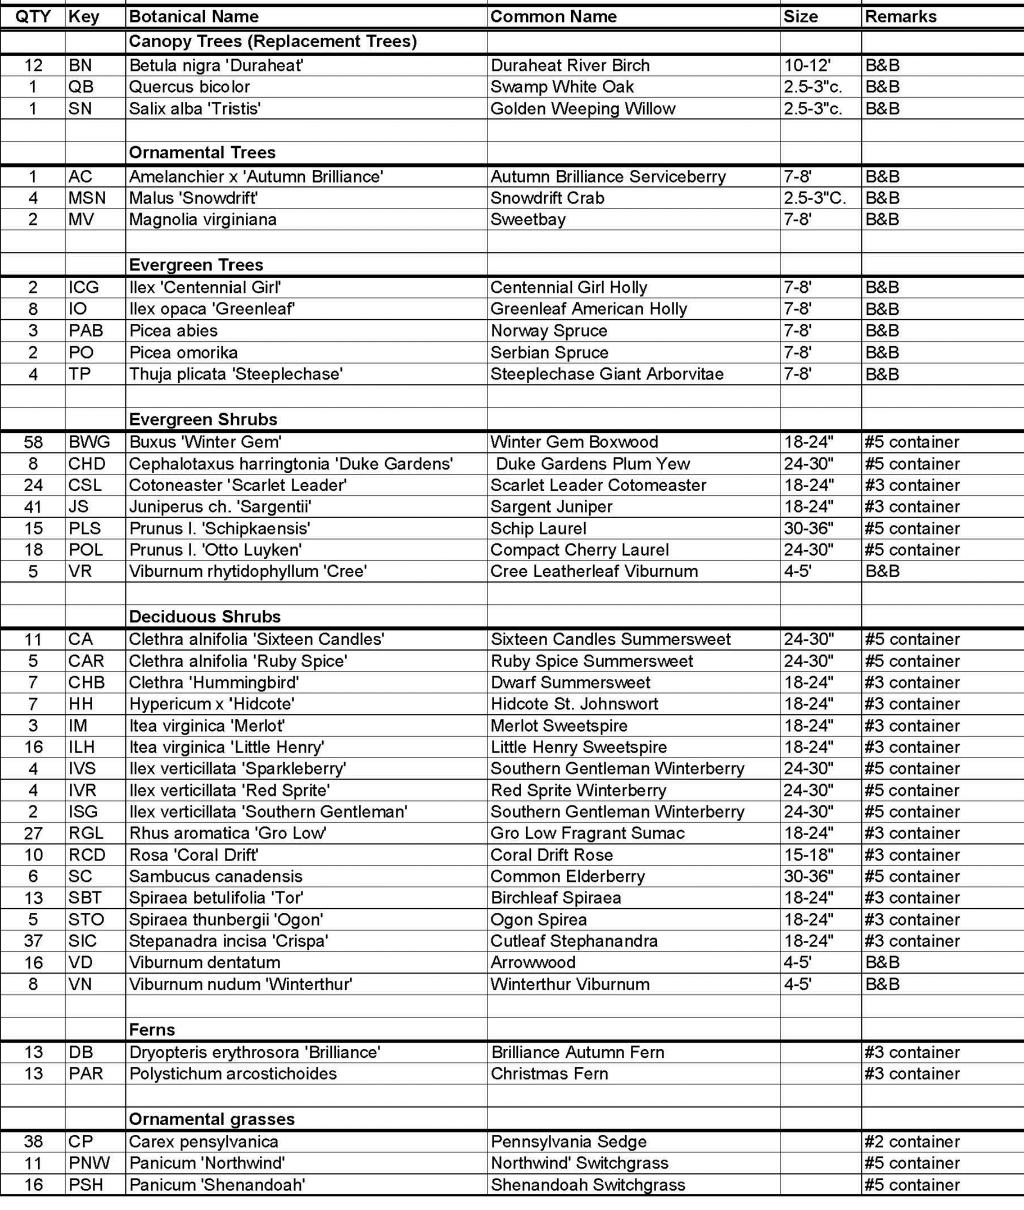

- All seeding shall be hydro-seeded with the following engineered wood fiber hydromulch as per manufacturer's specifications. Submit sample & product data for approval prior to
- Alternate bid unless otherwise noted, all disturbed landscape areas not being planted or mulched, shall be sodded with a turf-type tall fescue blend sod product.
- 10. Contractor shall submit source, sample, and certified seed analysis for landscape architect

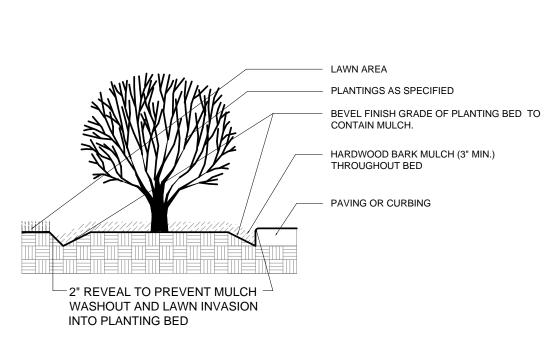

### TREE PROTECTION

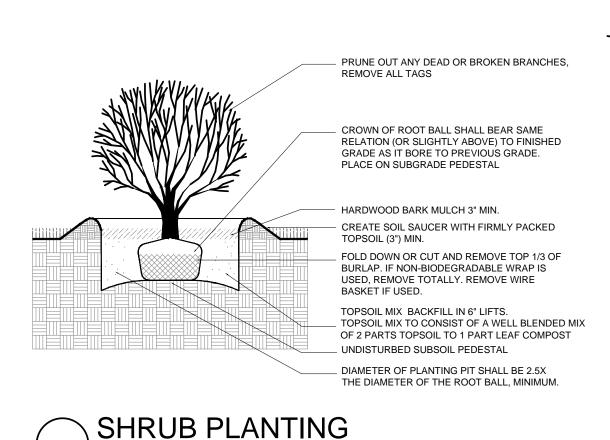

approval prior to ordering.

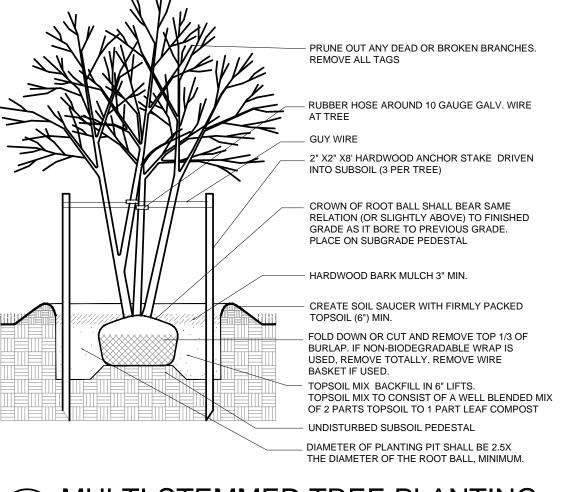

- Existing trees to remain shall be protected with temporary construction fence. Erect fence at edge of the tree dripline prior to start of construction.
- Contractor shall not operate vehicles within the tree protection area. Contractor shall not store vehicles or materials, or dispose of any waste materials, within the tree protection
- Damage to existing trees caused by the contractor shall be repaired by a certified arborist at the contractor's expense.
- No unauthorized tree removals, unless as specified on contract documents, approved by local municipalities, and architect.
- Edge of woods clearing
- Existing trees to remain shall be protected with temporary erosion control fence and hay bale barrier. Erect barrier at edge of the earthwork cut line prior to tree clearing. Lay out this line by field survey.
